THE COMFORT
YOU DESERVE

NEW

WALL-HUNG CONDENSING BOILERS
with stainless steel heat exchanger

CIAO X

A Carrier Company

 **Beretta**

DISCOVER ALL THE FEATURES AND ADVANTAGES OF CIAO X,

the new range of wall hung condensing boilers that offers you the comfort you desire, while combining technology and respect for the environment.

FOR A SUSTAINABLE FUTURE

CIAO X is born now, thinking of tomorrow. The new condensing range, in fact, is designed to operate with blends of natural gas and hydrogen - up to 20% - in line with the environmental sustainability objectives and the decarbonisation process started by the European Union.

NEW STAINLESS STEEL CORE

One of the main innovations of CIAO X range is the new condensing heat exchanger in stainless steel, made of a coiled smooth tube with a large section, ensuring optimized efficiency of the combustion, cleanness over time and high resistance to corrosion.

CIAO X EVERYWHERE

CIAO X features a modern and essential design, which blends easily into any setting. The **compact dimensions** and **low weight** allow the product to be easily installed anywhere, **not only inside the house**, but **also recessed in box or outdoors**, in a partially protected space. CIAO X is therefore **also ideal for the replacement of old boilers, both with DIN or with Beretta connection sequence**, thanks to the availability of accessory kits that simplify the conversion.

CONTROL YOUR COMFORT BY A TOUCH

One of the distinguishing characteristics of the new CIAO X is the digital touchpad interface, combining innovative design and features with user-friendliness.

By a simple touch on 7 points of the panel, it is possible to access in an intuitive way all the settings and parameters of the boiler and the system.
