NEW
EXCLUSIVE FE

COMPACTNESS AND FLEXIBILITY

EXCLUSIVE FE is a split type heat pump system with wall-hung indoor unit for heating, cooling and domestic water production. The system consists of an outdoor unit in R410A connected through refrigerant pipes to the indoor wall-hung unit.

The expert of residential heating for
over forty years.
Excellence and innovation for the air
conditioning of millions of Italian homes.

BERETTA

The residential heating specialist for over forty years. Always excellence and innovation for the climate of millions of Italian homes. Beretta today confirms its growth trend in the world of residential heating and, at the same time, faces new challenges with the same enthusiasm as at the beginning, the same dedication and unchanged vitality. Because excellence in the products and services offered remains the vocation and goal of all Beretta's actions.

BERETTA TODAY

EXCELLENCE

The great expertise acquired over the years in the residential heating sector has made Beretta one of the leading brands on the Italian market. Today, as in the past, the pursuit of excellence in every activity and, more specifically, constant attention to the products and services offered, represent Beretta's core values.

HEATING

Specialist in residential heating systems: this is the product mission. Beretta anticipates changes without compromising its vocation as reference brand in residential heating. A targeted expertise, honed and sustained on the front of a 360° investment. In this way, the Company responds to all plant engineering needs, thanks to the know-how gained in over forty years of leadership in the sector, and is constantly committed to expanding its offer of products and services. New technologies and new solutions that can integrate, with maximum efficiency, several energy sources, always giving priority to renewable energy.

EFFICIENCY

Targeted at residential heating, Beretta's offer is increasingly focused on systemic solutions for maximum energy efficiency through the intelligent integration of several energy sources.

TECHNOLOGY

Beretta has always demonstrated an exceptional ability to foresee changes and respond to the resulting evolution of needs. Two significant examples from the past: the Company was the first in Italy to produce a wall-hung gas boiler and - with model Idra Meteo - the first to produce a wall-hung outdoor boiler. A Progress orientation that today is increasingly translated into an ecological key with a vision of excellence and cutting-edge technology. Beretta's solutions focus on improving energy efficiency and reducing emissions for sustainability of the environment that surrounds us all and, equally important, to guarantee all the comfort that millions of users have always been accustomed to asking for and receiving from Beretta products.

TERRITORY

A network of specialists: proximity, expertise, flexibility throughout the national territory. Beretta is close to all its Customers with a capillary organisation capable of covering the entire country. A Customer orientation that translates concretely into proximity, expertise and flexibility. An important presence, not only in Italy but also worldwide. Today Beretta, more than 40 years after the construction of its first wall-hung gas boiler, is a world-renowned brand in the field of residential comfort, synonymous with technology and quality, everywhere. Beretta products are sold in more than 30 countries on all continents through Subsidiaries, Business Partners and Third Party Customers.

BERETTA PRODUCTS ARE SOLD THROUGH SUBSIDIARIES, SALES PARTNERS AND OEM CUSTOMERS IN **OVER 50 COUNTRIES** ON ALL CONTINENTS.

ENVIRONMENT

Beretta's commitment is concrete and is focused on an increasingly environmentally sustainable future. For some time now, Beretta has been totally dedicated to supporting a system logic that envisages the integration of several sustainable and renewable energy sources, in perfect harmony with the environment that surrounds us, for the domestic comfort of millions of users who use the brand's products every day and for the well-being of the planet.

MULTIMEDIA INSTRUMENTS

THAT GIVE THE INSTANT VIEW OF SIMULATIONS OF REAL APPLICATIONS.

In recent years, the air conditioning sector has faced major technological and regulatory changes, leading to the introduction of new operational and administrative procedures.

At the same time, an increasingly specialised market has accentuated the emergence of new qualifications and new plant solutions that have made it necessary to develop a constant training process.

These changes have involved all players in the sector, and to avoid them would mean missing the challenges of the future. For this reason, Beretta has further invested in training with the Centro Ateneo Beretta at its Lecco headquarters.

A modern, comfortable, well-equipped and technologically advanced environment, which allows the implementation of our training offer by giving the participant the opportunity to operate directly on working products.

**ATENEO**

Large structure for Technical Training and Commercial Events, with a space dedicated to the reception of participants and course rooms with working products.

**RESIDENTIAL COURSE ROOM**

Room dedicated to specific activities with products of less than 35 kW power.

ENERGY LABEL FOR HEAT PUMP

BERETTA PRESENTS **EXCLUSIVE FE**

EXCLUSIVE FE is a split type heat pump system with wall-hung indoor unit for heating, cooling and domestic water production. The system consists of an outdoor unit in R410A connected through refrigerant pipes to the indoor wall-hung unit.

The outdoor unit, compact and quiet, includes a Twin Rotary DC inverter compressor, electronic expansion valve, fans with brushless motor and finned pack coil optimized for heat pump operation even with outdoor air temperature of -20°C .

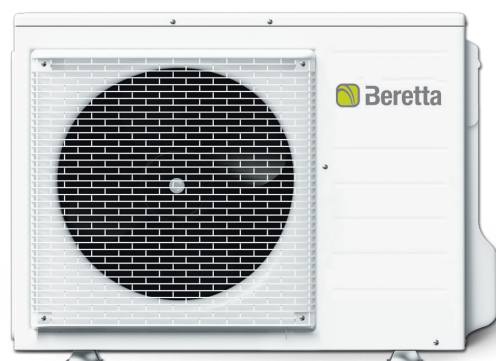

The indoor unit houses the main components of the hydronic system, high surface plate exchanger, high efficiency electronic circulating pump, collector for installation of an additional heating element available as accessory.

The indoor unit is extremely compact with all hydraulic and refrigerant connections from below.

Remove the front panel to access all internal components, the electronic service panel and the electrical terminal block.

The system control panel is simple and intuitive, with large backlit colour display. It is supplied complete with bracket to be positioned directly inside the rooms. It can be used as room control and allows integration with **CONNECT HYBRID** distribution systems.

As an alternative to the additional heating element, the **EXCLUSIVE FE** control can also manage an auxiliary heat source, such as a boiler, to be operated as integration or as backup.

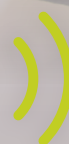

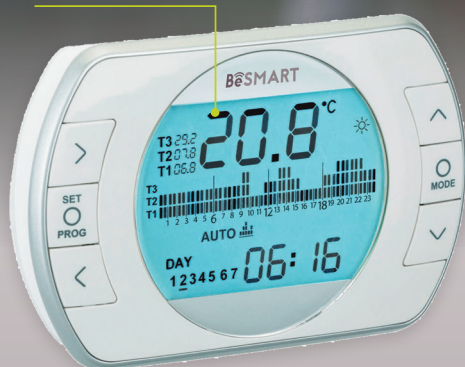

BeSMART

MUCH MORE THAN A THERMOSTAT.

SIMPLE.
UNIVERSAL.
ALWAYS WITH YOU.

**REMOTE SMART.
SMART FOR MOBILE.**

New backlit
display!

Are you going to the mountains?
Or are you coming back from a business trip?

Through the **BeSmart App**, you can manage the comfort of your home wherever you are, comfortably, easily and intuitively. From any tablet or Smartphone, you can not only check the status of your heating system, but also program switching on, switching off, temperature and operating hours of your boiler.

These and many more functions, are waiting to be discovered, with the BeSmart App.

- Boiler remote control with Modulating Chronothermostat and ON/OFF functions, connectable to the home WiFi.
- Simple to install and easy to connect to the internet
- Universal: on/off function compatible with all boilers.
- Always with you, via Smartphone and Tablet.

besmart-home.com

TOWER GREEN FE

THE CHOICE OF EFFICIENCY

TOWER GREEN FE (FULL ELECTRIC),
IS THE NEW BERETTA SPLIT HEAT PUMP FOR RESIDENTIAL
AIR CONDITIONING AND DOMESTIC HOT WATER
PRODUCTION, DESIGNED FOR THERMALLY AUTONOMOUS
HOMES.

Its refrigerant circuit is divided into an elegant column-shaped indoor unit and a compact and silent outdoor unit, optimised to operate down to a minimum outdoor temperature of -20 °C. The result of Beretta's experience in residential systems, TOWER GREEN FE is a ready-to-use solution that combines the installation flexibility of the split solution with top-of-the-range energy efficiency for room heating (A+++). Thanks to a wide range of models and the possibility of using the solar thermal circuit as an integration, TOWER GREEN FE is the ideal solution for heat pump air-conditioned new buildings.

TECHNOLOGY AND BENEFITS

01 Connections for design radiators

Connections specific for design radiators without mixing valves.

02 Connections for external boiler

The internal unit is fitted with specific connections for a secondary heat generator, controlled by the unit by means of a digital signal with the purpose of replacing the heat pump when needed.

03 Instantaneous production of domestic hot water

DHW is produced by using a high-efficiency stainless steel heat exchanger fully immersed inside the inertial tank. This solution does not require anti-legionella sanitization cycles.

04 Solar version of Tower Green FE S

It is fitted for connecting and controlling heat solar panels and make the most of renewable energy.

MYNUTE X

STEEL HEART, BERETTA TECHNOLOGY

MYNUTE X,
THE NEW RANGE OF CONDENSING BOILERS, WITH MANY
INNOVATIVE AND CONVENIENT
CHARACTERISTICS.

From the primary heat exchanger in stainless steel to the modern electronic interface, there are many new elements that distinguish MYNUTE X within the Beretta range.

The new condensing range, with its 5 models from 20 to 35 kW, with "combined" and "heating only" versions, responds to all residential comfort needs. High efficiency, low consumption and ease of installation make MYNUTE X the winning choice, both for new homes and for the replacement market.

With MYNUTE X, the new features of the project blend with Beretta's tradition of excellence, matured over almost half a century of experience in the home comfort sector. Its aesthetics, in line with the Beretta style of the latest generation of products, can be easily integrated into any living context, thanks also to its compactness and flexibility of installation.

HYDRONIC UNIT B HE

HYDRONIC UNIT B HE IS A MONOBLOC HEAT PUMP INTENDED FOR RESIDENTIAL APPLICATIONS AND ABLE TO MEET THE NEEDS FOR HEATING, COOLING AND THE PRODUCTION OF DOMESTIC HOT WATER. THE SYSTEM IS DESIGNED TO BE INSTALLED OUTDOOR AND CONNECTED TO RESIDENTIAL UTILITIES THROUGH DEDICATED HYDRAULIC LINES

The heat pump is compact and quiet. It includes a rotary DC inverter compressor, electronic expansion valve, fans with brushless EC motor and finned pack coil with hydrophilic treatment, optimized for heat pump operation with outdoor air temperature down to -20°C.

The winter operation of the unit is optimised and achieves high seasonal energy efficiency coefficients also thanks to the "Free Defrost" defrosting logic that allows, with positive external

air temperatures, to eliminate the ice formed on the finned pack of the coil without inverting the cycle. This allows to minimise the electricity consumption in the heating period, significantly increasing the comfort of the indoor environment.

HYDRONIC UNIT B HE CAN BE INSTALLED AS STAND ALONE HEAT GENERATOR, AS GENERATOR INCLUDED IN THE HYBRID CONFIGURATIONS AVAILABLE IN THE BERETTA OFFER AND AS SINGLE HEAT GENERATOR IN FULL-ELECTRIC SYSTEMS.

THE ENTIRE HYDRONIC UNIT B HE RANGE COMPLIES WITH THE ENERGY EFFICIENCY REQUIREMENTS SET BY THE PIEDMONT REGION LAW.

POWER MAX

THE NEW STAR IN CENTRAL HEATING SYSTEM

POWER MAX IS THE NEW BERETTA SOLUTION AS MODULAR CONDENSING WALL-HUNG SYSTEM.

Designed in our Research and Development Centres and industrialised in our factories, POWER MAX is Beretta's new wall-mounted power unit, which can be applied in both single and cascade configurations, up to 1120 kW. Complete with all the flue gas, hydraulic and safety accessories compliant requirements, POWER MAX is the ideal choice for central heating systems in condominiums, commercial sites, gyms, sports centres and industrial buildings. Thanks to its installation flexibility, reliability and ease of assembly, the new modular condensing system is Beretta's current and winning response both for the construction of new heating systems and for energy retrofit and replacement.

APPLICATION FLEXIBILITY

POWER MAX BOX STANDS OUT FOR THE MODULARITY AND FLEXIBILITY OF THE SOLUTIONS IT ALLOWS TO IMPLEMENT, A PLUS THAT IS INCREASINGLY APPRECIATED ALSO IN THE CENTRAL HEATING SYSTEM.

The 10 models that make up the POWER MAX BOX range, all usable in single configuration, cover an output range from 114 to 524 kW.

3 models of this range can also be combined in back-to-back cascade, and three models in linear cascade, reaching a maximum output of 896 kW and 1300 kW.

Adding up the single configurations to those in cascade, the POWER MAX BOX range allows to create 19 configurations, which, with the use of specific accessory kits, can total dozens of different types of applications (water-tight chamber, for outdoor use, with plate heat exchanger or separator, etc.), responding to the most varied system requirements.

**A+ SYSTEM****The HYBRID Systems consisting of combined boiler, solar collectors and Beretta heat pump form a class A+ system**

Modular thermally autonomous hybrid system

Suitable for heating, cooling and domestic water

Management of COMBINED condensing boiler, Hydronic Unit B HE heat pump and solar thermal unit

REC 10 H Hybrid System Management Control, to be installed in the home on the wall or on the boiler

Three possible configurations (A, B, C) each with 3 kits to manage a different number of zones (1 DIR; 2 DIR; 1HT+1LT):

KIT A (HYBRID DS) - for combined boiler and PDC with solar thermal unit connectable to a double-coil heater

KIT B (HYBRID MS) - for combined boiler and PDC that can be combined with a single-coil heater

KIT C (HYBRID WITHOUT HEATER) - for combined boiler and heat pump without heater

New under-boiler distribution module (kit) for applications without hydraulic separator**Hybrid systems for combined boilers**

Solar thermal unit; Hydronic Unit heat pump; Hybrid Ready combined condensing boiler

To house the Hybrid kits it is necessary to purchase the BOX, also compatible for built-in installation, code 20130808 and, if necessary, the cock kit code 20131752.

The Hybrid kit codes do not include boiler, solar collector, heat pump, heater and inertial buffer tank: to be chosen from the codes specified in the combination tables.

(A) Code consisting of 1pc. of REC 10H Hybrid Systems Management Control (Code 20134449), 1pc. of Hydraulic Module for hybrid distribution of 1 direct zone (Code 20165227) and 1pc. of the external probe kit with connector (Code 1220559).

 Solar thermal unit;  Hydronic Unit heat pump;  combined condensing boiler

To house the Hybrid kits it is necessary to purchase the BOX for built-in installation, code 20130808 and, if necessary, the cock kit code 20131752.

The Hybrid system codes do not include boiler, solar collector, heat pump, heater and inertial buffer tank: to be chosen from the codes specified in the combination tables.

Hybrid DS systems: with kit A, combined boiler, heat pump, solar - two zones (1HT + 1LT)

The system is controlled by the Rec 10 H hybrid control connected to Connect Hybrid, and the outdoor temperature probe connected to the boiler.

Basic layout purely for illustrative purposes

Key:

- 1 EXCLUSIVE C / MYNUTE X
- 2 STOR H 50 - 50-litre inertial buffer tank
- 3 HYDRONIC UNIT B HE / HYDRONIC UNIT LE B
- 4 BeSMART Comfort Control
- 5 REC 10 H hybrid systems management control (code sold in kit A - Hybrid DS) ⁽¹⁾
- 6 Kit A - (Hybrid DS), built into the BOX and with cock kit (optional)
- 7 Solar collector
- 8 Return-only solar hydraulic unit (code sold in kit A - Hybrid DS)
- 9 Solar management board (code sold in kit A - Hybrid DS)
- 10 Double-coil domestic water heater
- 11 Tivano Fan coil
- 12 BeSMART Wi-Fi
- 13 Diverting/mixing valve (code sold in kit A - Hybrid DS)
- 14 Photovoltaic input board (code sold in kit A - Hybrid DS)
- 15 Photovoltaic string with inverter
- 16 External probe

Possible solutions*:

- 1 HT zone or 1 direct LT zone
- 2 HT zones or 2 direct LT zones
- 1 HT zone + 1 LT zone (as per diagram)
- Cooling using TIVANO FAN COIL

(*) The mixed zone is managed with motorised mixing valves and self-modulating circulating pumps

⁽¹⁾ The REC 10H - Hybrid control, in the presence of Exclusive C boilers, can be installed on the boiler instead of the standard control panel.

If it is installed on the wall, it is necessary to disconnect the control on the boiler, while remaining on the machine.

For all configurations, refer to the applicable design and installation regulations and the technical manuals of the product.

 Hydronic Unit heat pump;  combined condensing boiler for built-in installation

To house the Hybrid kits it is necessary to purchase the BOX for built-in installation, code 20130808 and, if necessary, the cock kit code 20131752.

The Hybrid system codes do not include boiler, heat pump, heater and inertial buffer tank: to be chosen from the codes specified in the combination tables.

Hybrid DS systems: with kit E, heating-only boiler, heat pump - two zones (1HT + 1LT)

The system is controlled by the Rec 10 H hybrid control connected to Connect Hybrid, and the outdoor temperature probe connected to the boiler.

Basic layout purely for illustrative purposes

Key:

- 1 EXCLUSIVE / MYNUTE X
- 2 STOR H 50 - 50-litre inertial buffer tank
- 3 HYDRONIC UNIT B HE / HYDRONIC UNIT LE B
- 4 BeSMART Comfort Control
- 5 REC 10 H hybrid systems management control (code sold in kit E - Hybrid DS - heating-only / pdc) ⁽¹⁾
- 6 Kit E - Hybrid DS (heating only - pdc) built into the BOX and with optional cock kit
- 10 Double-coil domestic water heater
- 11 Tivano Fan coil
- 12 BeSMART Wi-Fi
- 13 Thermostatic mixing valve (optional code)
- 14 Photovoltaic input board (included in kit E - Hybrid DS - heating-only / pdc)
- 15 Photovoltaic string with inverter
- 16 External probe

Possible solutions*:

- 1 HT zone or 1 direct LT zone
- 2 HT zones or 2 direct LT zones
- 1 HT zone + 1 LT zone (as per diagram)
- Cooling using TIVANO FAN COIL

(*) The mixed zone is managed with motorised mixing valves and self-modulating circulating pumps

⁽¹⁾ The REC 10H - Hybrid control, in the presence of Exclusive R boilers, can be installed on the boiler instead of the standard control panel. If it is installed on the wall, it is necessary to disconnect the control on the boiler, while remaining on the machine. For all configurations, refer to the applicable design and installation regulations and the technical manuals of the product.

Floor standing combined with HYBRID heater

TOWER GREEN HE HYBRID S

A+ **SYSTEM**

TOWER GREEN HYBRID S + heat pump form a class A+ system

Management of multiple energy sources: condensing boiler, solar thermal unit, hydronic heat pump for heating and cooling
 Very high Modulation 1:10
 Low polluting emission: class 6 (UNI EN 15502)
 System zone circulating pumps: low consumption **self-modulating** with **head up to 7 m** ($EEL \leq 0.20$)
 Possibility to control up to 3 zones with kits that can be housed indoor
 Preset for connection to solar thermal panels and hydronic heat pump
 Remotely controllable interface equipped with ambient sensor
 18-litre solar circuit expansion reservoir as standard
 200-litre storage tank heater with double coil (5-year warranty)
 8-litre domestic water expansion reservoir as standard
 Thermoregulation with external probe as standard
 For gas conversion, please contact the authorised Beretta Technical Service Centres

Pre-mixed condensing boiler

CODE MTN	MODEL	DIMENSIONS H X L X D (mm)	HEAT INPUT Min - Max (kW)	HEATER CAPACITY (litres)	CLASS
COMBINED WITH HEATER					
20142496	TOWER GREEN Hybrid S 35/200 BSI with solar	1900 x 600 x 775	3.5 - 35	200 double coil	

The boiler is complete with a hydraulic compensator with a direct low consumption zone.

The code Tower GREEN HE HYBRID S does not include solar collector and heat pump: to be chosen according to the actual needs among the codes proposed in the combination tables.

EXCLUSIVE FE - WALL-HUNG SPLIT HEAT PUMPS

- **Wall-hung split heat pump system for heating, cooling and domestic hot water production.**
- **Wide range of outputs available, from 5 to 25kW.**
- High efficiency units up to A+++ class.
- Intelligent management of several auxiliary energy sources:
 - integrative heating element, boiler, solar thermal unit.
- **Twin Rotary DC inverter compressor and electronic expansion valve as standard.**
- Fan with brushless motor and finned pack coil optimised for operation at outdoor air temperature of -20°C.
- Outdoor units in R410A with compact size and very low noise.
- Front access to all components.
- Simple and intuitive control panel with large backlit colour display that can be positioned in the room also with ambient probe function (Class V ErP).

TOWER GREEN FE - FLOOR-STANDING SPLIT HEAT PUMPS

- **Floor-standing split heat pump suitable for heating, cooling and domestic hot water production.**
- High-efficiency units with models ready for A+++ class implementation.
- Simple and intuitive control panel with large backlit colour display and suitable for remote connection in the room.
- **Twin Rotary DC inverter compressor and electronic expansion valve as standard.**
- Fan with brushless motor and finned pack coil optimised for operation at outdoor air temperature of -20°C.
- **200-litre inertial buffer tank and high-surface stainless steel coil for instantaneous production of domestic hot water.**
- Compact size and very low noise.
- Hydraulic, electrical and refrigeration connections from above.
- Front access to all components.
- Simplified installation thanks to the cock kit (optional) and the hydraulic separator and circulating pump kits (necessary accessories).
- Outdoor unit pre-charged with R410A.
- **Connections for 2 direct zones with independent temperatures (dedicated connections for design radiators - MAX 1.5 kW).**
- Possible integration with a secondary generator through dedicated hydraulic connections and integrated management logics.

For correct installation of TOWER GREEN FE, the mandatory kits in the next page, in the specific accessory section, are required.

Delivery time of the material if not available in stock: up to 30 working days from order validation date.

The performance is in accordance with standards EN 14511:2013 and EN 14825:2016

(1) External air temperature 7°C D.B., 6°C W.B.; water inlet/outlet 30/35°C

(2) External air temperature 7°C D.B., 6°C W.B.; water inlet/outlet 40/45°C

(3) External air temperature 35°C; water inlet/outlet 23/18°C

(4) External air temperature 35°C; water inlet/outlet 12/7°C

(5) Value referred to the Average climate profile for delivery temperature of 35 °C. Values in accordance with Regulation 811/2013

(6) Tank set temperature 53°C. Values compliant with standard EN 16147

Floor-standing split heat pumps - three-phase

- 12 Solar return (3/4")
- 13 Solar delivery (3/4")

Presetting template for pipe outlet from the wall

Refrigerant connections between outdoor and indoor units

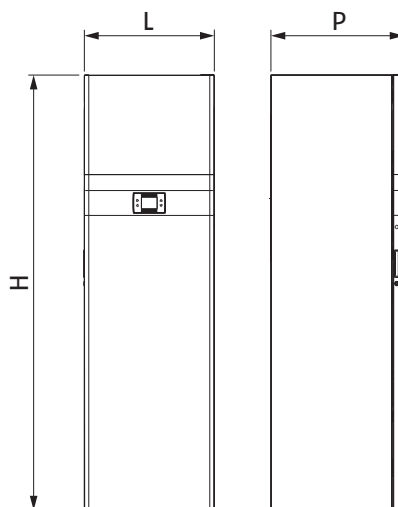

Length of 3/8" and 5/8" connection pipes without topping up gas charge		m	2 - 30
Top-up R410A charge required for lines between 30 and 50m in length		g/m	40
Maximum length allowed	L	m	50
Maximum difference in elevation between the 2 units when the outdoor unit is positioned higher	H1	m	30
Maximum difference in elevation between the 2 units when the outdoor unit is at a lower position	H2	m	15

No traps are required in the refrigerant lines as the compressors of the external units are equipped with oil separators.

HYDRONIC UNIT B HE - HYDRONIC HEAT PUMPS

- Hydronic air-water heat pump
- Modbus connectivity as standard
- **Variable speed circulating pump as standard**
- Source side exchanger with hydrophilic treatment as standard
- Free-defrost defrosting to optimise seasonal efficiency and environmental comfort
- Suitable for heating, cooling and domestic hot water production
- Rotary compressor with DC-Inverter technology
- Operating range -20°C/+46°C
- Maximum heating temperature 60°C
- Possibility of domestic hot water production by means of external 3-way valve
- Electronic expansion valve
- Expansion reservoir as standard
- Very low noise
- Refrigerant R410A
- Remote control not included, to be ordered separately

Single-phase heat pumps

CODE	MODEL	DIMENSIONS H X L X D (mm)	HEAT. ⁽¹⁾ /COOL. ⁽²⁾ OUTPUT (kW)	CLASS	
				55°C	35°C
20161618	HYDRONIC UNIT B HE 5	821 x 908 x 326	5.10 / 4.85

20020707	3.8 kW 1" 1/2 three-phase heating element kit ^{(2) (1)}

(1) For stand-alone installation

(2) The accessory must be ordered together with the base unit and is supplied not installed with finished product availability

(3) Only in combination with REC10CH remote control

(4) Mandatory in case of domestic water heater installation

(5) Includes 1 temperature probe for heater

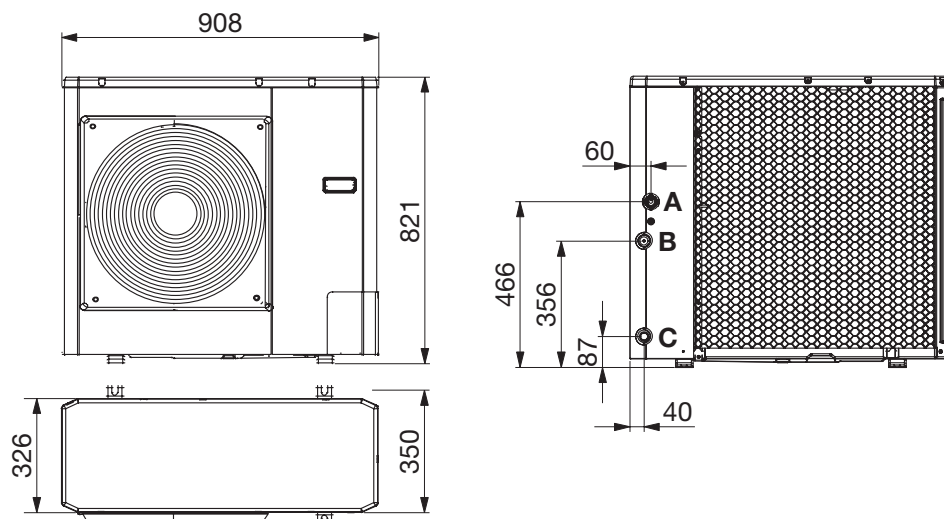

(6) Includes electrical power box and activation relay

(7) The kit includes the three-way diverting valve for DHW with heater probe

HYDRONIC UNIT LE - HYDRONIC HEAT PUMPS

- Hydronic air-water heat pump
- **Low-consumption circulating pump as standard**
- Suitable for heating, cooling and domestic hot water production
- Twin-Rotary compressor with DC-Inverter technology (4 kW Rotary)
- Operating range -20°C/+46°C
- Maximum heating temperature 60°C
- Possibility of domestic hot water production through 3-way external valve
- Electronic expansion valve
- Expansion reservoir as standard
- Very low noise
- Refrigerant R410A
- Remote control not included, to be ordered separately

Single-phase heat pumps

CODE	MODEL	DIMENSIONS H X L X D (mm)	HEAT. ⁽¹⁾ /COOL. ⁽²⁾ OUTPUT (kW)	CLASS

FREE start-up for Hydronic Unit LE heat pumps

For domestic water management we recommend a 230 Vac diverting valve with spring return or, as an alternative, if a phase-phase diverting valve is used, an changeover relay is required

Models for stand-alone applications only, not suitable for Tower Green Hybrid, Hybrid Box and Hybrid System

Three-phase heat pumps

**A+** SYSTEM**Ø50-Ø60**
INSIDE CHIMNEY**BeSMART**

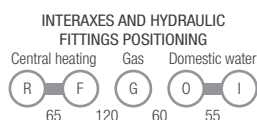

- **MySMART**, standard equipped with **BeSMART WiFi Control kit**, achieves an **A+** class system (without additional optionals).
- **Free of charge App** to download to smartphone or tablet for the boiler control and home comfort management, from anywhere you are.
- Can be matched with **BeSMART Control** working as **WiFi thermostat** in **OTBus** communication, allowing extensive **TOP advantages**.
- 10:1 modulation ratio, the highest range of modulation.
- **New condensing aluminium heat-exchanger with high flow rate and front access, assisting in simple maintenance.**
- **Low NOx: Class 6** According to European Directive UNI EN 15502.
- **Low Energy modulating circulator (EEI ≤ 0,20) with 6m head, adjustable up to 7m.**
- Thermoregulation as standard.
- **Possibility of inside-chimney installation via specific flue options in PP Ø80** (up to 140m), Ø60 (up to 26m) and Ø50 (up to 7m).
- Ø80mm twin system kit supplied as standard.
- Hydraulic cover supplied as standard.
- Supplied as standard: installation template with brackets, heating taps with filter, hydraulic connections in brass, gas and DHW taps.
- Can be converted to LPG through LPG kit (available as option).

(A) Allowing to manage a mixed zone (pump + motorized mixing valve 230Vac) or a direct zone (only pump). It is not necessary if you purchase CONNECT HYBRID.

(B) The first zone electronic board is always necessary. The boiler can manage up to three zones.

(C) In combination with codes 20150823 and 1220559, EXCLUSIVE achieves A+ system.

(1) It includes code 20129172 "90° Reduced concentric bend kit".

(2) It includes code 20129174 "Ø60/100 Vertical adapter kit".

he
BERETTA HIGH-EFFICIENCY

- **EXCLUSIVE BOILER GREEN HE is Beretta top of the range condensing appliance with built-in tank.**
- **Built-in stainless steel DHW tank (60 litres capacity) with magnesium anode.**
- **Low Energy, A-Class, synchronous pump (EEI ≤ 0.23), PWM controlled (4 mt on 25 B.S.I. and 6 mt on 35 B.S.I.) with different working options.**
- **10 : 1 modulation ratio, the highest range of modulation.**
- The RANGE RATED certification allows to adapt the power of the boiler to the real thermal requests of the installation.
- Lowest electrical consumption (only 66 Watt on 25 B.S.I.).
- 10 lt. expansion vessel.
- **Low NOx: Class 6** According to European Directive UNI EN 15502.
- Condensing heat-exchanger in extruded aluminium providing excellent thermal transfer.
- Built-in thermoregulation with external probe supplied as standard.
- IPX5D electrical protection.
- Exclusive BOILER GREEN HE can be converted to LPG through LPG kit supplied as standard.
- **Can be matched with BeSMART Control working as WiFi thermostat in OTBus communication, allowing extensive TOP advantages.**

**MYNUTE BOILER GREEN**

- **Built-in stainless steel DHW tank with magnesium anode** (capacity: 45 lt. on 25 B.S.I. E; 60 lt. on 35 B.S.I. E)
- **On ErP boilers: Low Energy, A-Class, synchronous pump** **EEI ≤ 0.20** (6 metres residual head adjustable from 4 metres to 7 metres).
- 10 : 1 modulation ratio on the new model 35 B.S.I. E
- The RANGE RATED certification allows to adapt the power of the boiler to the real thermal requests of the installation.
- **Low NOx: Class 6** According to European Directive UNI EN 15502.
- Condensing heat-exchanger in extruded aluminium providing excellent thermal transfer.
- Built-in thermoregulation (with external probe available as option).
- Ideal for low-temperature installations.
- IPX5D electrical protection.
- **Can be matched with BeSMART Control working as WiFi thermostat in OTBus communication, allowing extensive TOP advantages.**

MYNUTE Lx - MYNUTE S

On Lx models only:

- **New low NOx emissions cooled burner (Class 6** - According to European Directive UNI EN 15502).
- **Low Energy, synchronous pump $EEL \leq 0.20$.**
- Primary heat exchanger in copper.
- DHW plate heat exchanger in stainless steel.
- Two air inlet holes (right and left side).
- Expansion vessel 9 litres.
- Intuitive and easy-to-use control panel with backlit digital display.
- Built-in thermoregulation (external temperature probe as option).
- IPX5D electrical protection.
- Lower cover available as option (for 24 C.S.I., 28 C.S.I., 28 R.S.I. models).
- Hydraulic connections, gas and DHW taps available as option.
- **Can be matched with BeSMART Control working as WiFi thermostat in OTBus communication, allowing extensive TOP advantages.**

Conventional flue

Combi low NOx wall-hung boilers

QUADRA II Lx - QUADRA II

On Lx models only:

- **New low NOx emissions cooled burner (Class 6** - According to European Directive UNI EN 15502).
- **Low Energy, synchronous pump EEL ≤ 0.20.**
- Primary heat exchanger in copper.
- DHW plate heat exchanger in stainless steel.
- Efficiency ★★★ according to European Directive EEC 92/42 (on room-sealed models).
- Two air inlet holes (right and left side).
- Expansion vessel 8 litres.
- 3-speed circulator, located on the right side of the boiler (no ErP models).
- Intuitive and easy-to-use control panel with backlit digital display.
- Compact dimensions and low lift weight enable a flexible installation with the boiler able to be sited almost anywhere in the home.
- **DIN connections**, to enable an easy installation both as a replacement or in new buildings with the same configuration.
- Built-in thermoregulation (external temperature probe as option).
- Hydraulic connections, gas and DHW taps available as option.
- QUADRA II can be converted to LPG through specific LPG kit (as option).
- **Can be matched with BeSMART Control working as WiFi thermostat in OTBus communication, allowing extensive TOP advantages.**

**CONNECT HYBRID**

- Hydraulic separators to be matched with EXCLUSIVE C/R boilers in hybrid systems.
- **Low Energy self-modulating pumps (EEI≤0.20).**
- For direct zone, two direct zones, or 1 high temperature zone and 1 low temperature zone.
- Motorized mixing valve on mixed zone.
- Setting of independent climatic curves for each zone.
- **To be used with control manager REC10 H.**
- Limit thermostat for low temperature installations supplied as standard.
- Specifically designed only for in-wall installations (INDOOR and OUTDOOR).
- Possibility to connect the zones thermostats.

Connect Hybrid - Low Energy with motorized mixed zones

CODE	MODEL	ZONES	DIMENSIONS H x W x D (mm)
20130801	CONNECT HYBRID 1D ⁽¹⁾ ⁽²⁾	1 direct zone	see BOX

Due to exposition to sunlight, the colour of the material (PP) may be altered.

(*) Class H1 - High positive pressure (max. 5,000 Pa).

(1) New CIAO AT 25 kW.

(A) The straight low curve adapter codes are used to use flue Ø 60/100 available in the catalogue with Exclusive/Mynute X and new Ciao AT boilers.

(**) ATTENTION: For the flue options Ø60/100 concentric flue system in plastic (PP/PPU) clips are not necessary, except for the connection to the boiler.
In fact clips are already included in the codes 20132020 and 20132018.

Combi floor-standing boilers with built-in DHW tank, for solar thermal

TOWER GREEN HE S

he BERETTA HIGH-EFFICIENCY

- **TOWER GREEN HE S + solar collectors enables to create a Class A+ System in DHW.**
- **Low Energy, A-Class, auto-modulating system pumps (EEI ≤ 0.23).**
- **10 : 1 modulation ratio, the highest range of modulation.**
- Possibility to manage up to 3 heating zones.
- **Low NOx: Class 6** according to European Directive UNI EN 15502.
- Condensing heat exchanger.
- Suitable for connection with solar thermal collectors.
- 200 lt. built-in DHW double-coil tank.
- Interface with wide display for complete management, that can be removed from the boiler and located inside the house as a control panel.
- Pump for solar circuit as standard.
- Flow-meter on solar circuit as standard.
- 18 lt. expansion vessel for solar circuit as standard.
- Mixing valve as standard.
- 8 lt. expansion vessel for DHW circuit as standard.
- Built-in thermoregulation with external probe supplied as standard.
- Built-in hydraulic separator with one direct zone with low energy pump.
- Display languages: ITALIAN and ENGLISH.
- **Can be matched with BeSMART Control working as WiFi thermostat (no OTBus communication).**

Premix condensing

'Heating only' cast-iron floor-standing boilers

NOVELLA RAP

- High quality cast-iron heat-exchanger.
- Piezoelectric ignition with ionization flame control.
- Standard efficiency, higher than 90%.
- Compact sizes: it is suitable for the installation in any kind of plant room.
- Thermostatic control board provided with a total shut-off function.
- Can be converted to LPG through LPG kit (supplied as option).
- **Can be matched with BeSMART Control working as WiFi thermostat (no OTBus communication).**

Conventional flue

According to the European Directive ERP, the following products are not allowed to be placed on the European market by the manufacturer since 01/08/2015

CODE	GAS	MODEL	DIMENSIONS H × W × D (mm)	OUTPUT (kW)

LOW NOX INSTANTANEOUS - GAS	170
FLUE OPTION SYSTEMS	174

DHW wall-hung heat pumps

ACQUAZENIT

- **Heat pump for domestic hot water production, wall mounted.**
- Heat pump operating air temp. from -7°C to 35°C (ACQUAZENIT E 80 – E 120).
- Heat pump operating air temp. from +7°C to 35°C (ACQUAZENIT 80 – 120).
- **Combination of heat pump and back up electric heating** (electric heater included).
- Rotation compressor on heat pump side.
- Heat pump condenser wraps around DHW tank.
- Legionella control function.
- Built-in enamelled DHW tank with magnesium anode.
- High insulation grade of the tank for low heat losses.
- Easy and fast installation.
- DHW temperature production up to 75°C.
- TURBO mode for fast hot water production.
- Diagnostic, alarms and hot water storage information.
- Large display with touch screen.
- Advanced electronic control with timing, temperatures and operating mode selection.

HP-E 260 ACS

■ **Air-to-water heat pump for DHW production**

■ 3 models available:

- HP 260 ACS model with only heat pump.
- HP 260 ACS S: heat pump with an auxiliary coil for solar panels back-up.
- HP 260 ACS SC: heat pump with two auxiliary coils for both boiler and solar panels back up.

■ Condenser externally wrapped to the boiler free from fouling and gas-water contamination.

■ Tank in steel with two layers vitrification.

■ Thermal insulation with injected polyurethane with high thickness.

■ External coating in ABS.

■ R134a refrigerant charger.

■ Built-in double-enamelled DHW tank (260 l capacity) with magnesium anode.

■ Electrical resistance provided as standard (1.5kW).

■ Legionella cycle management through parameters (up to 70°C).

■ Outdoor temperature probe for automatic insertion of the resistance with temperature not favorable to the heat pump.

■ Working range: -5°C to +32°C.

■ BOOSTER function (only in AUTO mode).

■ Remote ON/OFF for complete unit (Timer) and for electrical heater.

DHW floor-standing heat pumps

CODE	DESCRIPTION	DIMENSIONS H x Ø (mm)	HEATING CAPACITY (kW)	C.O.P. ⁽²⁾	ENERGY CLASS
20125646	HP-E 260 ACS (a)(b)	1845 × 660	1.95	2.92	A ⁺

20125648	HP-E 260 ACS SC (a)(c)	1845 × 660	1.95	2.92	A ⁺

(a) On all versions, a thermostatic mixing valve is needed to reduce the DHW temperature that, without it, in particular with a solar coil, can reach dangerous levels.

(b) This model allows to integrate in addition a combi boiler as back-up through a solar diverter mixing valve (code 20035644).

(c) For the control of the solar circuit it is needed a specific controller to be chosen among the different available accessories.

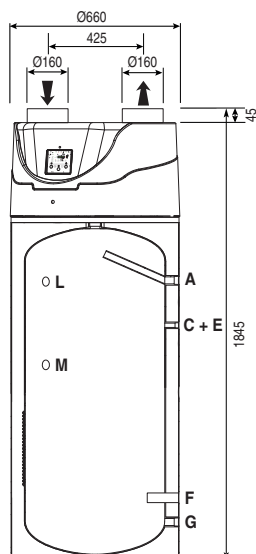

(2) Value obtained on the whole drawing cycle (load profile L), at a reference temperature of 54°C, according to EN16147.

Accessories

Lx 14	123.5	123.5

- Instantaneous, conventional flue water heater **with dedicated versions for natural gas and LPG.**
- **Battery ignition** (2 x 1.5V batteries supplied as standard).
- High DHW load profile (**XL on the 14 lt model**).
- **Abundant production of domestic hot water** at Δt 25°C of 11 and 14 liters/min.
- **Innovative electronic gas valve without membrane for speedy maintenance.**
- **New self-adapting system with thermostatic device.**
- **High output modulation and domestic hot water flow rate.**
- **Electronic reset from the user interface of the domestic hot water and flues thermostats**, in case of anomalies (RESET button).
- Innovative **interface with back-lit display**, 3 buttons and a LED for battery replacement.

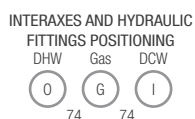

Conventional flue

(1) Dimensions without flues.

- **New gas water heaters for indoor installation.**
- **Low Nox** range according to EN 814-2013.
Low Nox value < 56 mg/kWh, via cooled burner.
- Air-gas combustion, with 3:1 modulation ratio.
- A wide range of models of 11, 13 and 17 lt, available both as NG and LPG versions.
- New back-lit display with icons, 40x30 mm, with four push-buttons.
- New electronics with innovative performance.
- New aesthetics lines, in accordance with the wall-hung boilers style.
- Frost protection kit for outdoor installation with resistance (down to -10°C).
- Ø60 and Ø80 air-inlet for the models 11 and 13 lt.
- Ø60/100 flue exit.

Room-sealed

HORIZONTAL ASSEMBLY

Flat roof brackets - complete kits for SCF-25/4B horizontal assembly systems

CODE	DESCRIPTION
20104730	Bracket kit for FLAT ROOF 1 horizontal collector SCF-25/4B
20104732	Bracket kit for FLAT ROOF 2 horizontal collectors SCF-25/4B
20104734	Bracket kit for FLAT ROOF 3 horizontal collectors SCF-25/4B

End connection accessories code 20132142 containing Ø22 weld-in connections to be placed at the ends of collectors and crimped connections to be placed at the outlet of the hydraulic unit/heater to connect to copper tubes are available separately. Otherwise, it is possible to use code 20108734 "female end connection kit" to have female connections at both ends of the collector. Refer to the SCF-25/4B collector page for composition of bracket kits.

SCF-25/4B SYSTEM - SYSTEM COMPOSITION

SCF-25/4B 200/1 (cod. 20184357)

REF.	QUANTITY	CODE	DESCRIPTION
A	1	20184340	SCF-25/4B collector
B	1	20119552	IDRA DS 200 FI (B class) cylinder
C	1	4383059	10 kg glycol
D	1	4383052	18 lt expansion vessel
E	1	1150529	3/4" thermostatic mixing valve

SCF-25/4B 300/2 (cod. 20184358)

REF.	QUANTITY	CODE	DESCRIPTION
A	1	20184341	2 pcs. of SCF-25/4B collector (in 1 package)
B	1	20119553	IDRA DS 300 FI (B class) cylinder
C	1	4383059	10 kg glycol
D	1	4383052	18 lt expansion vessel
E	1	1150529	3/4" thermostatic mixing valve

SCF-25/4B 400/3 (cod. 20184618)

REF.	QUANTITY	CODE	DESCRIPTION
A	1	20184340	SCF-25/4B collector
A	1	20184341	2 pcs. of SCF-25/4B collector (in 1 package)
B	1	20119554	IDRA DS 430 FI (B class) cylinder
C	1	4383085	5 kg glycol
C	1	4383059	10 kg glycol
D	1	4383053	24 lt expansion vessel
E	1	1150529	3/4" thermostatic mixing valve

To complete the installation it is necessary to purchase the complete bracket kits, choosing them according to the number of collectors, from slanting roof kit, undertile roof bracket kit for slanting roof and flat roof kit.

Forced circulation systems SISTEMA SCF-20/4B

- A** SCF-20B collector with sealed aluminium frame - 2 m²
- B** EVOSOL solar control box
- C** IDRA cylinder with increased coil surface
- D** Solar hydraulic return group for wall-mounting installation with circulator suitable for PVM and ON/OFF management
- E** Glycol
- F** Solar expansion vessel
- G** 3/4" thermostatic mixing valve

Systems for flat and pitched roof - Brackets not included

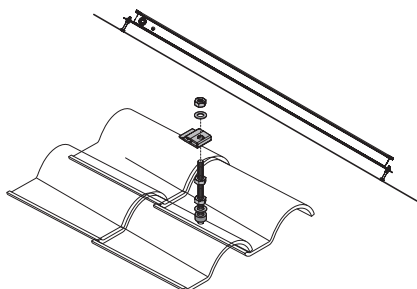

CODE	MODEL	NUMBER OF COLLECTORS	CYLINDER CAPACITY (litres)	COLLECTORS DIMENSIONS H X L (mm)	COLLECTORS TOTAL AREA (m ²)
SYSTEMS WITH DOUBLE COIL CYLINDER					
20131683	SCF-20/4B 200/1	1	208 double coil	1818 x 1097	1.91
20131684	SCF-20/4B 300/2	2	301 double coil	1818 x 2194	3.82
20131685	SCF-20/4B 400/3	3	442 double coil	1818 x 3291	5.73
20131688	SCF-20/4B 500/4	4	551 double coil	1818 x 4388	7.64

To complete the installation it is necessary to buy, according to the number of collectors and to the kind of roof and installation, complete brackets kits for flat or pitched roof or undertile brackets kits.

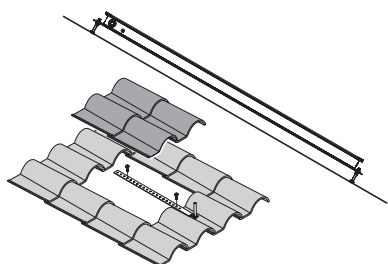

SISTEMA SCF-20/4B - BRACKETS COMPLETE KITS

Brackets for PITCHED ROOF - complete kits for SCF-20/4B systems

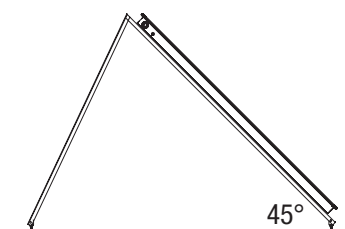

CODE	DESCRIPTION
20104652	Bracket 1 collector in //
20104654	Bracket 2 collectors in //
20104656	Bracket 3 collectors in //
20104659	Bracket 4 collectors in //

Undertile brackets for PITCHED ROOF - complete kits for SCF-20/4B systems

CODE	DESCRIPTION
20104685	Undertile bracket 1 collector
20104686	Undertile bracket 2 collectors
20104687	Undertile bracket 3 collectors
20104688	Undertile bracket 4 collectors

Flat roof brackets - complete kits for SCF-20/4B systems

CODE	DESCRIPTION
20104677	Bracket 1 collector at 45° for flat roof
20104679	Bracket 2 collectors at 45° for flat roof
20104680	Bracket 3 collectors at 45° for flat roof
20104682	Bracket 4 collectors at 45° for flat roof

End connection accessories code 20132142 containing Ø22 weld-in connections to be placed at the ends of collectors and crimped connections to be placed at the outlet of the hydraulic unit/heater to connect to copper tubes are available separately. Otherwise, it is possible to use code 20108734 "female end connection kit" to have a female connection at both ends of the collector. Refer to the SCF-20B collector page for composition of bracket kits.

The ending fittings for the connection of Ø 22 copper pipes (code 20014661), containing weld-on fittings, to be put at the collector inlet-outlet, and screw-on fittings, to be put at the inlet/outlet of hydraulic group/solar cylinder, are available separately. For the composition of brackets kit refer to SCF-20B dedicated section.

The ending fittings for the connection of stainless-steel flexible pipes containing weld-on fittings, to be put at the collector inlet-outlet, and screw-on fittings, to be put at the inlet/outlet of hydraulic group/solar cylinder, are available separately. For the composition of brackets kit refer to SCF-20B dedicated section. As an alternative, it is possible to use the code 20108734 "female ending fitting kit" in order to have, at the two collectors ends, a female connection. For the composition of brackets kit refer to SCF-25B dedicated section.

To complete the installation it is necessary to buy, according to the number of collectors and to the kind of roof and installation, complete brackets kits for flat or pitched roof or undertile brackets kits.

Natural circulation system SISTEMA NB-SOL

- Natural circulation system for the production of DHW, performing best in areas with high levels of sunlight and mild winters.
- Ready-to-be-installed system, complete with collector(s), cylinder, fittings and glycol.
- Blue selective absorber surface.
- Ease of functioning: no need of any additional components such as a circulator or an electronic controller.
- Complete with anti-irradiation film to be taken away at the activation of the system.
- Collector stagnation temperature: 192 °C.
- Magnesium anode included with the standard equipment.
- DHW and solar safety valves (10 bar and 2.5 bar).
- Enamelled double-walled steel cylinder with polyurethane insulation.
- Electrical resistance and mixing valve available as accessories.
- NB-SOL system can be matched with combi wall-hung boilers.
- Shock-proof plastic cover protects the cylinder.
- Systems conform to the EN12975 and EN12976 standards.

Complete natural circulation systems* - for FLAT ROOF

CODE	MODEL	NUMBER OF COL- LECTORS	CYLINDER CAPACITY (litres)	COLLECTORS DIMENSIONS H X L (mm)	COLLECTORS TOTAL AREA (m ²)

- Sealed collector with aluminium profile - 2.5 sq.m
- Highly selective absorber surface
- The collector glass is equipped with protective film, to be removed when the system is commissioned
- Rock wool insulation (40 mm)
- Collector absorption: 95%
- Collector stagnation temperature: 197 °C
- Possibility of connecting in series up to 6 collectors horizontally and 10 vertically
- 5-year warranty for solar panel
- Compliance with EN 12975, ISO 9806 and Solar Keymark certificate

Collector with aluminium profile - 2.5 sq.m

CODE	DESCRIPTION
20026577	Manual degasser kit ⁽¹⁾
20132142	Copper tube connection accessory Ø22
20094627	Kit of two end compression fittings for collectors ⁽²⁾

(1) Use one for each set of collectors.

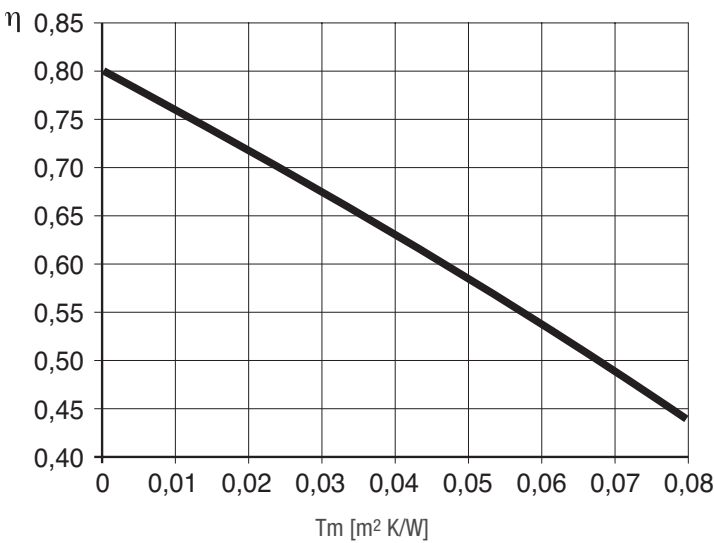

(2) Use one for each row of SCF-25/4B collectors.

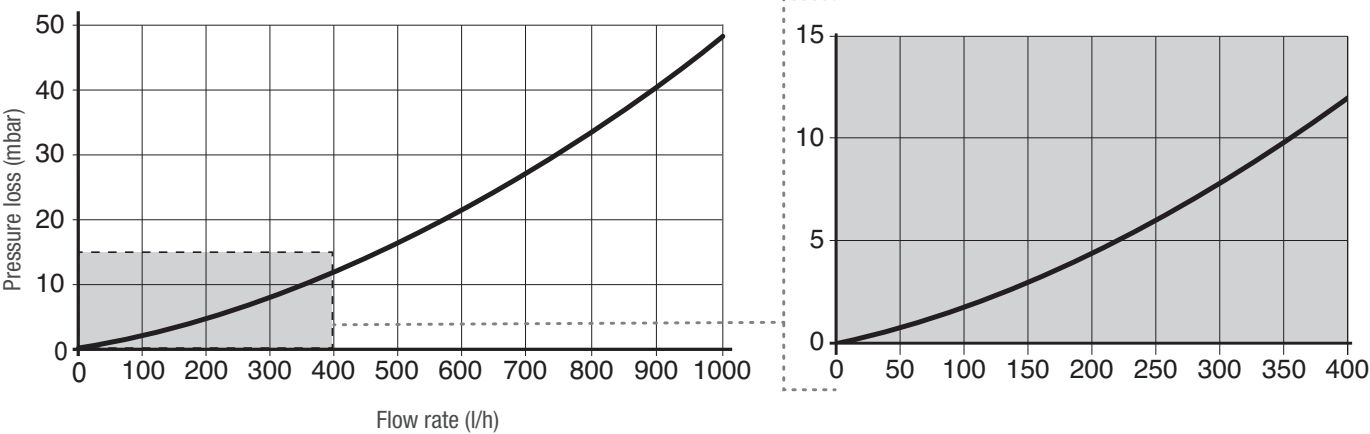

DESCRIPTION	PROFILE COLLECTOR SCF-25/4B	u.o.m.
Total surface	2.30	m ²
Opening surface	2.15	m ²
Effective absorber surface	2.14	m ²
Connections (M) - (F)	2 x 1" M / 2 x 1" F	-
Empty weight	40.0	kg
Liquid content	1.6	l
Recommended flow rate per m ² of panel	30	l/h
Glass thickness	3.2	mm
Absorption (α)	95	%
Emissions (ϵ)	4	%
IAM (50°)	0.95	-
η coll. (at 1000 W/m ²)	62	%
Maximum allowed pressure	10	bar

Collectors for forced circulation systems

SCF-25B - COLLECTOR WITH SEALED ALUMINIUM FRAME - 2.5m²

- Collector with sealed aluminium frame - 2.5 m².
- Highly-selective aluminium absorber area.
- Complete with anti-irradiation film to be taken away at the activation of the system.
- Insulation in rock wool (40 mm).
- Collector stagnation temperature: 197 °C.
- Collector absorption: 95%.
- Possibility to connect up to 6 collectors in a series.
- This solar collector conforms to the EN 12975.
- Connection between collectors by means of 2 floating couplings.

Collector with sealed aluminium frame - 2.5 m²

CODE	DESCRIPTION	CODE	DESCRIPTION
20014661	Ending connection fittings kit for 2.5 m ² collector*	20108734	Female ending fitting kit**
20132219	Ø18 copper connection fittings kit (for cylinder)		

* The kit contains the fittings for connection to copper pipes Ø 22 mm to be put at the inlet-outlet of the collectors series and the fittings to be inserted at the outlet of the cylinder or of the flow-return hydraulic group.

** The kit contains a fitting that allows to have, on both ends of the collector, a female connection.

Collectors for forced circulation systems

SCF-20B - COLLECTOR WITH SEALED ALUMINIUM FRAME - 2m²

- Collector with sealed aluminium frame - 2 m².
- Highly-selective aluminium absorber area.
- Complete with anti-irradiation film to be taken away at the activation of the system.
- Insulation in glass wool (30 mm).
- Collector stagnation temperature: 192 °C.
- Collector absorption: 95%.
- Possibility to connect up to 6 collectors in a series.
- This solar collector conforms to the EN 12975.
- Connection between collectors by means of 4 floating couplings.

Collector with sealed aluminium frame - 2 m²

CODE	MODEL	DIMENSIONS H x L (mm)	COLLECTOR TOTAL AREA (m ²)

Accessories

CODE	DESCRIPTION	CODE	DESCRIPTION
20014661	Ending connection fittings kit for 2.5 m ² collector*	20108734	Female ending fitting kit**
20132219	Ø18 copper connection fittings kit (for cylinder)		

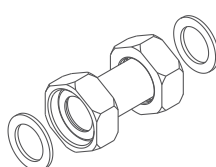

* The kit contains the fittings for connection to copper pipes Ø22 mm to be put at the inlet-outlet of the collectors series and the fittings to be inserted at the outlet of the cylinder or of the flow-return hydraulic group.

** The kit contains a fitting that allows to have, on both ends of the collector, a female connection.

20108734 FOR COLLECTOR

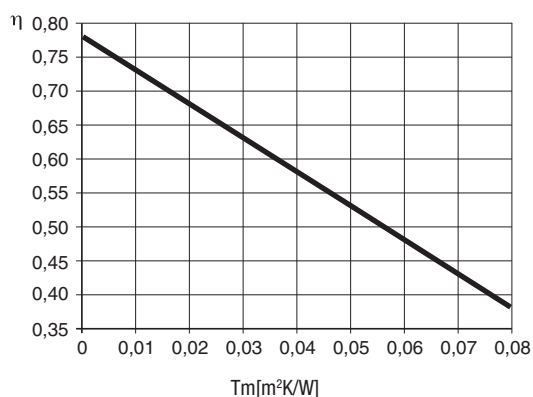

SCF-20B - COLLECTOR WITH SEALED ALUMINIUM FRAME - 2m²

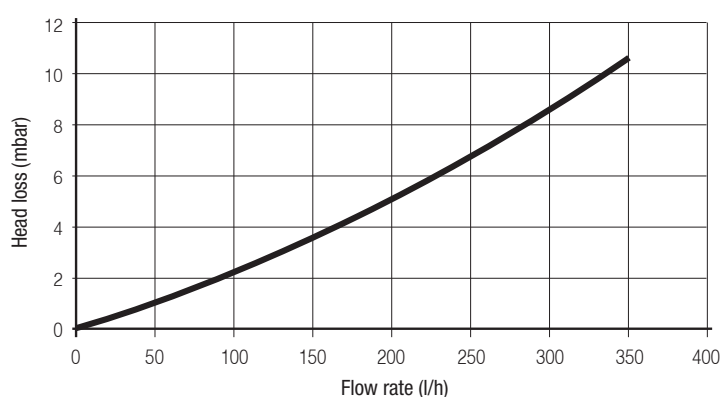

Technical specifications

DESCRIPTION	SEALED ALUMINIUM FRAME COLLECTOR SCF-20B	UOM
Total area	1.91	m ²
Exposed area	1.78	m ²
Effective absorption area	1.77	m ²
Connections (M) - (F)	2 X 1" M / 2 X 1" F	-
Weight (empty)	30	kg
Liquid content	1.5	l
Recommended flow rate for 1 m ² collector	30	l/h
Glass thickness	3.2	mm
Absorption (α)	95	%
Emissions (ε)	4	%
IAM (50°)	0.87	-
η coll. (at 1000 W/m ²)	58	%
Maximum permitted pressure	10	bar
Stagnation temperature	192	°C

Efficiency curve

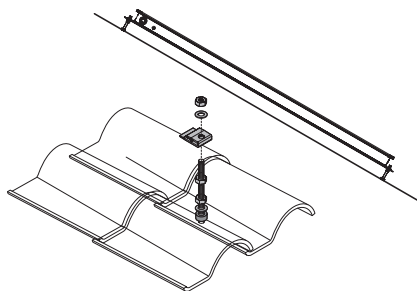

Head loss in solar collector (*)

(*) Test referred to a glycol-water mixture (33.3% - 67.7%), with 20 °C temperature of the heat-transfer fluid.

**IDRA FI - WITH LOW ENERGY HYDRAULIC GROUP AND SOLAR CONTROL BOX**

- Solar cylinders with pre-installed flow/return hydraulic group (featuring a **Low Energy modulating circulator**) and EVOSOL solar control box
- Vertical steel enamelled solar cylinder with double coil
- Sacrificial magnesium anode included with the standard equipment
- Maximum working temperature 99°C
- Coils and cylinders maximum working pressure: 10 bar
- Hydraulic group safety valve maximum working pressure: 6 bar
- High heat exchange capacity of the coils
- Suitable for electrical resistance

20119914	3.8 kW Three-phase flanged electrical resistance		

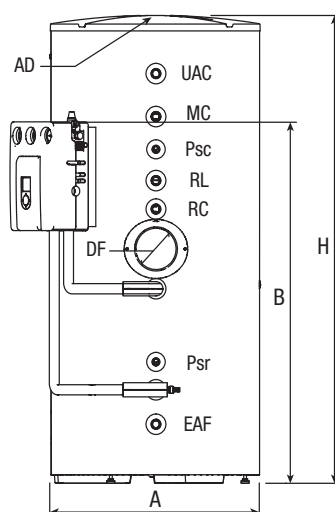

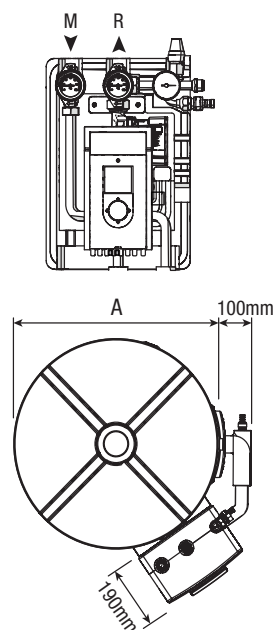

⁽¹⁾ To connect the electrical anode kit to the EVOSOL solar control box, provide a reduction (not supplied as standard).

⁽²⁾ Necessary in case of recirculation system only.

N.B. The sacrificial magnesium anode should be periodically monitored and replaced.

N.B. Bertea strongly recommend to connect the tanks to the electrical earth of the plant.

Net weight	222	245	kg

(*) At $\Delta T = 45^\circ\text{C}$, ambient 20°C and storage at 65°C .

**IDRA N DS - WITH HIGH STORAGE CAPACITY**

- Vertical steel enamelled solar cylinder.
- Maximum working temperature 99 °C.
- Double coil heat-exchanger.
- High heat exchange capacity of the coils.
- Suitable for electrical resistance.
- Double magnesium anode included with the standard equipment.

Double coil cylinder with high storage capacity

HEAD LOSSES

Single coil DHW cylinders

IDRA BV

- Enamelled DHW tank, ideal to be matched with Beretta wall-hung boilers R.A.I./R.S.I. ('only heating' models).
- Supplied with high thermal-exchange coil.
- Wide range to meet all DHW needs.
- Magnesium anode supplied as standard.
- Double magnesium anode supplied as standard on BV 1000 model.

**IDRA HP - FOR HEAT PUMPS AND SOLAR THERMAL**

- Vertical storage tank in vitrified steel for DHW production.
- Ideal for application with heat pumps thanks to the increased surface of the coil heat-exchanger.
- Flange for solar coil heat-exchanger kit (available as option).
- Maximum working temperature 99 °C.
- Coils maximum working pressure: 6 bar.
- Suitable for electrical resistance.
- Magnesium anode included as standard.

**STOR M and STOR - WITH COIL OR FLANGED**

- Designed for forced circulation solar systems to supplement the heating system.
- Production of DHW through an additional external heat exchange module "ACS" (see dedicated pages).
- STOR M and STOR tanks are not suitable for DHW storage.
- Tank and coil maximum working temperature: 99°C.
- Eight fittings at different heights for the use of different types of heat generators for the best stratification.
- Buffer tank and insulation are delivered in separate packages for STOR models.
- STOR M models: supplied with heat exchange solar coil and insulation as standard equipment.
- STOR models: through a standard flange it is possible the insertion of an additional heat exchange solar coil, available as accessory.

N.B. This picture only represents STOR M. For STOR models see drawing at the following page.

STOR M HEAD LOSSES

HEAD LOSSES OF STOR EXCHANGE COIL (ACCESSORY)

**STOR H**

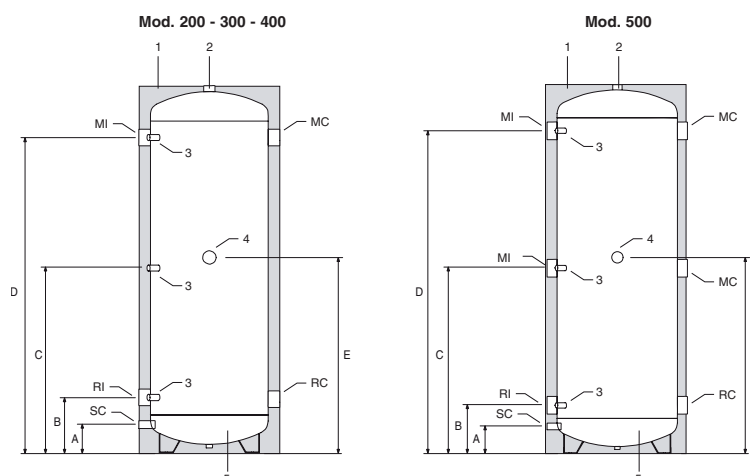

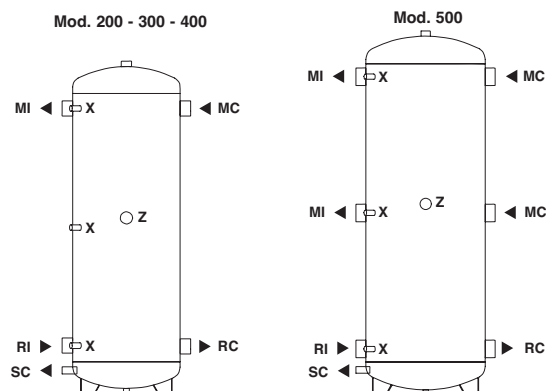

- Inertial cold/hot water buffer tank, **ideal to be used in systems with heat pumps, solar thermal, biomass boilers.**
- It can be easily fitted into systems where Beretta boilers work as an auxiliary heat generator.
- The fittings are positioned at different heights for use in high and low temperature circuits.
- Possibility to integrate an electrical resistance.

20123856	Additional heater probe for EVOSOL and SUN 5 PRO 5 RS control unit ⁽¹⁾

⁽¹⁾ The solar control boxes are already equipped with probes

- Heat exchange unit on solar side
- Suitable for medium-sized solar systems
- Wall installation
- Can be used for two storages
- Effective for layering at two heights
- Solar control unit as standard
- Low-consumption circulating pumps as standard
- Electronic management of circulating pump on solar circuit
- Motorised diverting valve
- AISI 316 plate heat exchanger
- Complete with thermal insulation
- Complete with flow meter for visualisation of flow rate on storage side

Solar circuit heat exchange unit - technical water

CODE	MODEL	DIMENSIONS H X L X D (mm)	MANAGEABLE COLLECTOR SURFACE (m ²)
20156326	SC SUN 50 ⁽¹⁾	600x400x250	20 *

(1) Available from April 2021

* Domestic water production at 45°C, with inlet at 10°C and storage temperature at 55°C.

- Heat exchange unit on solar side
- Suitable for large solar systems
- Wall installation
- Can be used for two storages
- Effective for layering at two heights
- Solar control unit as standard
- Low-consumption circulating pumps as standard
- Electronic management (0-10 V) of circulating pump on solar circuit
- Motorised diverting valve
- Electronic flow meter for visualisation of flow rate on storage side
- Complete with thermal insulation
- AISI 316 plate heat exchanger

Solar circuit heat exchange unit - technical water

CODE	MODEL	DIMENSIONS H X L X D (mm)	MANAGEABLE COLLECTOR SURFACE (m ²)
20156327	SC SUN 120 ⁽¹⁾	840x480x220	80 *

(1) Available from April 2021

* Domestic water production at 45°C, with inlet at 10°C and storage temperature at 55°C.

Solar circuit heat exchange unit - domestic hot water

CODE	MODEL	DIMENSIONS H X L X D (mm)	MANAGEABLE COLLECTOR SURFACE (m ²)
20156331	SC SUN 120 ACS ⁽¹⁾	840x480x220	80 *

(1) Available from April 2021

* Domestic water production at 45°C, with inlet at 10°C and storage temperature at 55°C.

- Heat exchange unit for instantaneous production of domestic hot water in small and medium solar systems
- Wall installation
- Standard control unit (SC ACS 40, SC ACS 80)
- Thermostatic mixing valve as standard (SC ACS 25, SC ACS 35)
- Electronic temperature control (SC ACS 40, SC ACS 80)
- Low return temperature on primary circuit
- Low-consumption circulating pump as standard
- AISI 316 plate heat exchanger
- Possibility of cascade installation
- Possibility of recirculation kit installation

Technical water - domestic hot water heat exchange unit

CODE	MODEL	DIMENSIONS H X L X D (mm)	DOMESTIC WATER PRODUCTION (*) (litres/min.)
20156322	SC ACS 25 ⁽¹⁾	600x400x250	19
20156324	SC ACS 35 ⁽¹⁾	600x400x250	28
20156325	SC ACS 40 ⁽¹⁾	600x400x250	38
20182669	SC ACS 80 ⁽¹⁾	835x475x226	60

(1) Available from April 2021

* Domestic water production at 45°C, with inlet at 10°C and storage temperature at 55°C.

Accessories

CODE	DESCRIPTION
20083502	Recirculation kit SC ACS 25 and SC ACS 35 ⁽¹⁾
20182673	Recirculation kit SC ACS 40 ⁽²⁾
20182676	Recirculation kit SC ACS 80 ⁽³⁾

20182675	Cascade kit 3 x SC ACS 40 ⁽⁴⁾
20182677	Cascade kit 2 x SC ACS 80 ⁽⁵⁾
20182678	Cascade kit 3 x SC ACS 80 ⁽⁵⁾

(1) Use only one recirculation kit both in case of single SC ACS and in case of SC ACS in cascade.

(2) Use the recirculation kit only in case of single SC ACS 40.

(3) Use the recirculation kit only in case of single SC ACS 80.

(4) SC ACS 40 cascade kit includes the recirculation kit.

(5) SC ACS 80 cascade kit includes the recirculation kit.

Heat exchanger units

SC ACS

- Heat exchange unit for instantaneous production of domestic hot water
- Suitable for large solar systems
- Control unit as standard
- Low return temperature on primary circuit
- Two low-consumption circulating pumps as standard
- Electronic management (0-10 V) of circulating pump on solar circuit
- Modulating circulating pump for DHW recirculation
- AISI 316 plate heat exchanger

Technical water - domestic hot water heat exchange unit

CENTRALIZED HEATING

CONDENSING WALL-HUNG BOILERS	250
WALL HUNG MODULAR SYSTEMS	258
FLOOR MODULAR SYSTEMS	281
FLUE OPTION SYSTEMS	296

**POWER X**

- **New bimetallic (stainless steel - copper) condensing heat exchanger.**
- Total premix burner with **low NOx emissions: Class 6** (UNI EN 15502).
- Low Energy modulating synchronous pump (ErP compliant - $EEL \leq 0.20$), 7m head, with anti-blockage cycles system.
- Built-in 18 lt. expansion vessel (on 35 R.S.I. model).
- 18 lt. internal expansion vessels available as option (for the 50 DEP R.S.I., 50 R.S.I. and 50 models).
- Built-in 3 ways valve with anti-blockage cycles system (on the models 35 R.S.I., 50 DEP R.S.I., 50 R.S.I.).
- Climatic thermoregulation as standard with outdoor probe (as option).
- Management of three circuits: high temperature, low temperature and DHW tank.
- ΔT flue/water return: max 5°C.
- LPG conversion kit available as standard.

Premix condensing

7	20123886	Connection kit for DHW tank return (for RSI versions)			

(*) According to I.N.A.I.L. Italian Safety Certification Institute (mandatory only on the Italian market), the kit is composed by: type-approved safety thermostat with manual reset [100(0-6°C)]; type-approved thermometer (0-120°C); thermometer wellduct; type-approved safety valve (3.5 bar); type-approved safety pressure switch with manual reset; type-approved manometer-holder 3-ways tap; damper coil; type-approved manometer (0-6 bar); brass fitting connection.

Accessories - Supports for installation

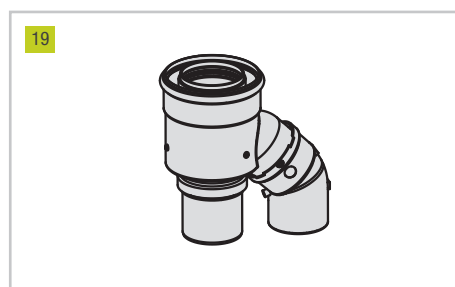

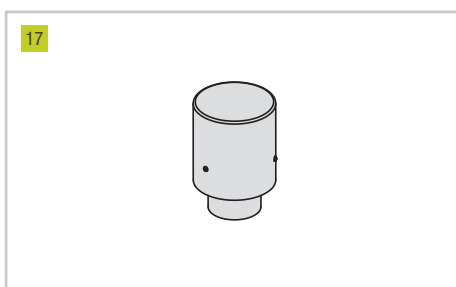

REF.	CODE	DESCRIPTION
14	20046101	Power X rig (front mounting)
15	20047606	Rear mounting kit for free-standing application

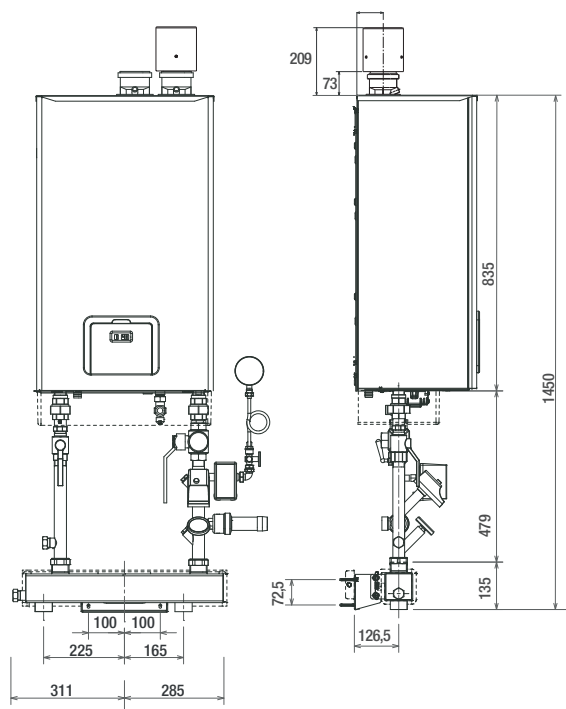

(*) In case of use of the concentric flue ranges Ø60/100 or Ø80/125, with flue exit from the back side wall of the boiler, via a 90° bend, it is necessary to purchase the rear spacer frame kit, code 20120468 (75.5 mm depth).

Accessories - Flue adapters

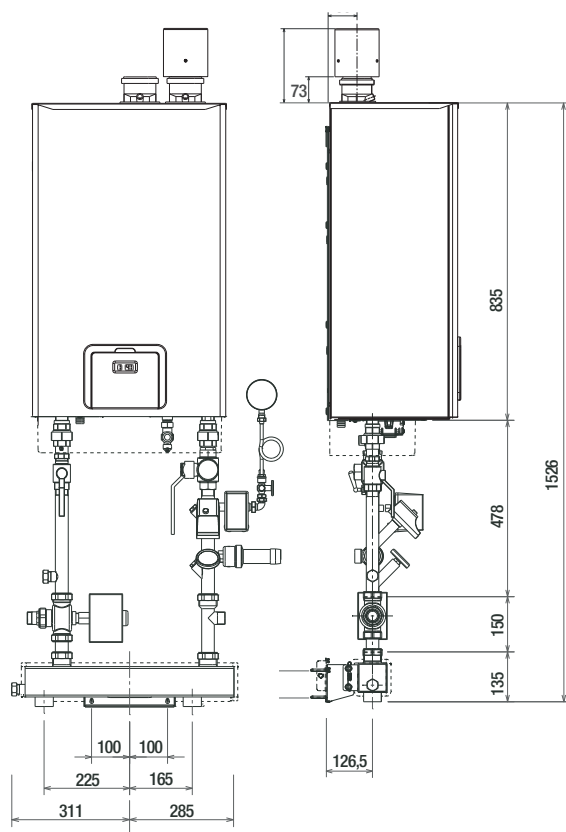

REF.	CODE	DESCRIPTION
FLUES / AIR INTAKE		
17	20137538	Air-intake kit B23

**POWER X 50: Configuration for Central Heating only**

CODE	DESCRIPTION	Q.TY
20114814	Power X 50 (A)	1
20166652	External probe kit	1
20028473	Hydraulic manifold for safety kit (B)	1
20028474	Safety kit (B)	1
20043895	Gas safety cut-off valve 200kW	1
20028475	Hydraulic header separator kit	1
20137538	Air-intake kit for B23 installation (C)	1

- (A) Inside the Power X 50, it is possible to insert, in the proper compartment, the optional expansion vessel kit of 18 lt. (code 20119840).
- (B) Optional safety component, according to I.N.A.I.L. Italian Safety Certification Institute (mandatory only on the Italian market).
- (C) The Power X configurations can be completed with the flue options Ø80 mm of the section FLUES for CONDENSING BOILERS of the International Product Catalogue. As an alternative, you can use the concentric flue options Ø60/100 mm (by purchasing the flue adapter kit from Ø80-80 to Ø60/100, code 20137535) or the concentric flue options Ø80/125 mm (by purchasing the flue adapter kit from Ø80-80 to Ø80/125 code 20137536). In both cases, the accessory air-intake kit B23, code 20137538, is not necessary. In case of use of the concentric flue ranges Ø60/100 or Ø80/125, with flue exit from the back side wall of the boiler, via a 90° bend, it is necessary to purchase the rear spacer frame kit, code 20120468 (75.5 mm depth).

In both cases, the accessory air-intake kit B23, code 20137538, is not necessary.

(C) Inside the R.S.I. models of Power X range, the 3-ways valve for DHW tank management is already built-in (like in this configuration).

(D) In case you don't need a free-standing application and you wish to anchor the Power X rig to the wall, you don't need to purchase the rear mounting kit, code 20047606.

**POWER MAX**

- **New condensing high power boiler range that can be installed both as stand-alone or as cascade configuration.**
- New condensing heat exchanger in stainless steel.
- **Low NOx: Class 6** According to European Directive UNI EN 15502.
- **Thanks to embedded 'Managing/Depending' control logic, any boiler can be configured either as the 'Managing' or as a 'Depending' boiler within the cascade (same product code).**
- **Possibility to cascade up to 1120 kW.**
- Built-in thermoregulation with external probe supplied as option.
- Modulating and modular power regulation.
- Automatic burner ignition sequence reversal (at adjustable steps).
- Simultaneous control of two different circuits: DHW tank and high temperature.
- **Management of up to 16 zones through an optional kit.**
- Automatic summer/winter switch-over.
- 'Anti-legionella' function as standard.
- Suitable for remote control management (0-10V input or Modbus) via optional kit.
- **Availability of a wide range of accessories for complete configurations.**
- Can be converted to LPG through LPG kit supplied as standard.

8
STAND-ALONE
configurations

70
FRONT CASCADE
configurations

70
BACK-TO-BACK CASCADE
configurations

Power MAX range consists of **8 MODELS**, that can be installed either as stand-alone or in cascade configuration (front and back to back), totalling **148 configurations** in all.

ATTENTION:

Every model is available under different codes, according to the documentation language/s of the instruction manual supplied with the product.

Please select the right code of your model according to the documentation language you need:

- IT / EN (Italian / English)
- FR (French)
- PT (Portuguese)
- PL / HU / RO (Polish / Hungarian / Romanian)
- SK / CZ / GR / SI / CR (Slovak / Czech / Greek / Slovenian / Croatian)

POWER MAX - STAND ALONE APPLICATION

A - CONFIGURATION GUIDE FOR STAND ALONE APPLICATION AND ACCESSORIES SELECTION

For the selection of the components of the stand alone configuration, please follow the flow chart below and refer to the relevant tables in the following pages.

1. STAND ALONE BOILER CONFIGURATION

2. ACCESSORIES TO COMPLETE THE SYSTEM

3. OPTIONAL ACCESSORIES

3.1 Shunt pumps

3.2 Additional safety devices

3.3 Hydraulic separator or plate heat exchanger

3.4 Secondary circuit management

3.5 Sealed chamber conversion kit

3.6 Flue system

3.7 Remote control

3.8 Treatment systems for condensate neutralization

1. Stand alone boiler configuration

Model	POWER MAX 50 P DEP	POWER MAX 50 P	POWER MAX 65 P	POWER MAX 80 P	POWER MAX 100	POWER MAX 110	POWER MAX 130 (115 Hi)	POWER MAX 150
Heat Input Boiler kW	34.9	45	57	68	90	97	112	131

POWER MAX - SINGLE APPLICATION - SELECTION OF COMPONENTS

2. Accessories to complete the system

CODE	DESCRIPTION
20132778	External probe
20133102	Condensate drain trap kit for stand alone boiler ⁽²⁾

⁽²⁾ Kit not required for POWER MAX 50 P DEP and 50 P. Kit to be used for POWER MAX 65 P - 80 P - 100 - 110 - 130 (115 Hi) - 150 models

3. Optional accessories

3.1 Shunt pumps (only for 100÷150 kW)

CODE	DESCRIPTION
20125034	Injection pump kit POWER MAX 100 - 110 - 130 (115 Hi) ^(A) ^(B)
20125035	Injection pump kit POWER MAX 130 ^(A) ^(C)
20125040	High head injection pump kit POWER MAX 150 ^(A) ⁽³⁾

^(A) For POWER MAX 50 P DEP - 50 P - 65 P - 80 P models the pump is already present in the boiler

^(B) The pump, which can be housed in the boiler, offers a high residual head on POWER MAX 100 and 110, and with these boilers it is also suitable in combination with the plate exchanger; if the pump is used with POWER MAX 130 (115 Hi) it allows the combination with the hydraulic separator but not with the plate exchanger

^(C) If combined with POWER MAX 150, this circulation pump can be fitted inside the boiler and offers a very low residual head (10 mbar); it must be used ONLY in combination with the horizontal hydraulic separator code: 20131897

⁽³⁾ This circulation pump cannot be fitted inside the boiler, it must be installed under the boiler

3.2 Additional safety devices

CODE	DESCRIPTION
20142219	SA installation kit for stand-alone boiler ⁽¹⁾ ⁽²⁾
20131898	Manifold kit with safety devices for stand alone boiler ⁽⁴⁾
20143981	Safety valve kit 5.4 bar - 3/4" ⁽⁵⁾
20131899	Tube kit for connection to hydraulic separator for stand alone boiler ⁽⁵⁾

⁽¹⁾ **This kit is necessary for the stand-alone installation.** It contains: Connection Pipe kit (1x code 20131899), Hydraulic Separator kit for stand alone boiler (1x code 20131897), Condensate drain trap (1x code 20133102), Safety valve 5.4 bar (1x code 20143981) and 2 Ball Valves.

⁽²⁾ Condensate drain trap (code 20133102) is not included in the boilers (except for POWER MAX 50 P DEP and 50 P).

⁽⁴⁾ Includes all safety devices, including the CE and approved 1/2" safety valve and the 1" G fuel shut-off valve.

⁽⁵⁾ To be used in Italy exclusively with POWER MAX 50 P DEP.

POWER MAX - SINGLE APPLICATION - SELECTION OF COMPONENTS

3.3 Hydraulic separator or plate heat exchanger

CODE	DESCRIPTION
20131897	Horizontal hydraulic separator kit - for POWER MAX stand alone
20133224	Hydraulic separator cover kit - for POWER MAX stand alone
20125037	Two/three-way valve kit ⁽⁶⁾
20131663	Frame kit for front cascades ^(E)
20131664	Frame conversion kit for BACK-TO-BACK cascades ^(E)
20132368	Plate exchanger kit for stand alone boiler POWER MAX 50 P DEP - 50 P ⁽⁷⁾
20132369	Plate exchanger kit for stand alone boiler POWER MAX 65 P - 80 P ⁽⁷⁾
20132370	Plate exchanger kit for stand alone boiler POWER MAX 100 - 110 ⁽⁷⁾
20132371	Plate exchanger kit for stand alone boiler POWER MAX 130 (115 Hi) ⁽⁷⁾
20132372	Plate exchanger kit for stand alone boiler POWER MAX 150 ⁽⁷⁾
20136823	Delivery/return line fittings kit for direct installation (35-135 kW) ^(D)
20139239	Expansion reservoir kit for stand alone boiler POWER MAX 50 P DEP - 50 P
20145587	Cover for plate exchanger

⁽⁶⁾ The two-way valve kit combined with the plate exchanger kit codes for stand alone boiler (except code 20132368) allows the direct production of DHW.

⁽⁷⁾ It includes the plate exchanger and the connection trains; the plate exchanger always requires the frame kit code 20131663 and a pump with high residual head, therefore on boilers Power Max 130 and Power Max 150 it is necessary to use the high head circulating pump

^(D) Kit compatible with all POWER MAX models in case of presence of kit and without the need of hydraulic separator

^(E) The frame is necessary in case of installation with plate exchanger; if the frame kit is not fixed to the wall, it is necessary to buy also the kit for the use of the front and back frame code 20131664.

3.4 Secondary circuit management

CODE	DESCRIPTION
1220599	Secondary circuit/heater probe ^(A)
20136713	3-way valve kit for domestic hot water production for POWER MAX 50 P DEP
20125037	Two-way valve kit for POWER MAX 100 - 110 - 130 (115 Hi) - 150 ^(C)
20130811	Electronic kit for management of single direct or additional mixed zone (max 16) ^(B)

Note: BeSMART Comfort Controls can be used for room temperature adjustment

^(A) Probe necessary for the boiler or to control the secondary circuit, with temperature alignment with the one set for the primary circuit

^(B) The kit includes the necessary probe for the mixed zone

^(C) The two-way valve kit combined with the plate exchanger kit codes for stand alone boiler (except code 20132368) allows the direct production of DHW

POWER MAX - SINGLE APPLICATION - SELECTION OF COMPONENTS

3.5 Sealed chamber conversion kit

CODE	DESCRIPTION
20131665	Type C conversion kit for POWER MAX 50 P DEP - 50 P - 65 P - 80 P
20131668	Type C conversion kit for POWER MAX 100 - 110 - 130 (115 Hi) - 150

3.6 Flue system

Accessories of flue gas exhaust Ø 80 mm for POWER MAX 50 P DEP - 50 P - 65 P - 80 P

CODE	DESCRIPTION
20131270	Spacer kit for wall mounting ⁽¹⁾

(1) Kit necessary for wall rear concentric exhaust.

Note: for each type, check the maximum equivalent lengths by referring to the technical data sheet and/or by contacting the pre-sales service.
For flue gas exhaust system refer to page 345.

3.7 Remote control

CODE	DESCRIPTION
20132366	POWER MAX remote control kit ⁽⁷⁾

⁽⁷⁾ Necessary for hourly programming of the heater and for programming of zones (also those managed by the additional zone kits)

3.8 Treatment systems for condensate neutralization

CODE	DESCRIPTION
4031811	Neutralization kit HN2 up to 270 kW ^(C) ^(D)
4031810	Neutralization kit N2 up to 450 kW ^(C)

^(C) Delivery time of the material if not available in stock: up to 30 working days from order validation date.

^(D) With condensate booster pump

POWER MAX - CASCADE APPLICATION - SELECTION OF COMPONENTS

B - GUIDE TO SYSTEM CONFIGURATION WITH CASCADE BOILERS AND SELECTION OF ACCESSORIES

For selection of components for cascade configuration, follow the flowchart going to the corresponding tables

1. BOILERS CASCADE CONFIGURATION

2. SELECTION OF THE LAYOUT FRONT OR BACK-TO-BACK

3. ACCESSORIES TO COMPLETE THE SYSTEM

4. ACCESSORIES

4.1 Support frame

4.2 Shunt pumps

4.3 Connection pipes

4.4 Water collectors (delivery/return) -gas-condensate

4.5 Additional safety devices

4.6 Hydraulic separator or plate heat exchanger

4.7 Secondary circuit management

4.8 Sealed chamber conversion kit

4.9 Flue gas exhaust systems

4.10 Remote control

4.11 Treatment systems for condensate neutralization

POWER MAX - CASCADE APPLICATION . CONFIGURATIONS

1. Boiler cascade configuration

Output obtainable with cascade system installation.

Model	POWER MAX 50 P DEP	POWER MAX 50 P	POWER MAX 65 P	POWER MAX 80 P	POWER MAX 100	POWER MAX 110	POWER MAX 130 (115 Hi)	POWER MAX 150
Heat Input Boiler kW	34.9	45	57	68	90	97	112	131
No. of boilers	Total cascade heat input (Hi)							
2	70	90	114	136	180	194	224	262
3	105	135	171	204	270	291	336	393

POWER MAX - CASCADE APPLICATION - SELECTION OF COMPONENTS

4.2 Shunt pumps (only for 100÷150 kW)

CODE	DESCRIPTION
20125034	Injection pump kit POWER MAX 100 - 110 - 130 (115 Hi) (A) (B) (12)
20125035	Injection pump kit POWER MAX 130 (A) (C)
20125040	High head injection pump kit POWER MAX 150 (A) (D) (13)

(A) For POWER MAX 50 P DEP - 50 P - 65 P - 80 P models the pump is already present in the boiler

(B) The pump, which can be housed in the boiler, offers a high residual head on POWER MAX 100 and 110, and with these boilers it is also suitable in combination with the plate exchanger; if the pump is used with POWER MAX 130 (115 Hi) it allows the combination with the hydraulic separator but not with the plate exchanger

(C) If combined with POWER MAX 150, this circulation pump can be fitted inside the boiler and offers a very low residual head (10 mbar); it must be used **ONLY** in combination with the horizontal hydraulic separator code: 20131897

(D) This circulation pump cannot be fitted inside the boiler, it must be installed under the boiler

(12) To be ordered for each boiler of the cascade system (qty = no. of boilers); pump to be installed inside the boiler

(13) To be ordered for each boiler of the cascade system (qty = no. of boilers); pump to be installed outside the boiler

4.3 Connection pipes

FRONT CONFIGURATION	
CODE	DESCRIPTION
20130658	Trains without shut-off for POWER MAX 50 P DEP - 50 P - 65 P - 80 P - 100 - 110 - 130 (115 Hi) - 150 (15)
20131124	Trains with shut-off for POWER MAX 50 P DEP - 50 P - 65 P - 80 P - 100 - 110 - 130 (115 Hi) - 150 (15) (A)
20131121	Trains without shut-off for POWER MAX 150 (external pump) (16)
20131125	Trains with shut-off for POWER MAX 150 (external pump) (16) (A)

(A) The "trains with shut-off" kits allow to exclude the single thermal module in order to proceed with its maintenance, while the other thermal modules continue to work

(15) To be ordered for each boiler of the cascade system (qty = no. of boilers) with pump or valve installed inside the boiler

(16) To be ordered for each boiler of the cascade system (qty = no. of boilers) with pump installed outside the boiler

POWER MAX - CASCADE APPLICATION - SELECTION OF COMPONENTS

BACK-TO-BACK CONFIGURATION

CODE	DESCRIPTION
20130658	Trains without shut-off for POWER MAX 50 P DEP - 50 P - 65 P - 80 P - 100 - 110 - 130 (115 Hi) - 150 ⁽¹⁷⁾
20131124	Trains with shut-off for POWER MAX 50 P DEP - 50 P - 65 P - 80 P - 100 - 110 - 130 (115 Hi) - 150 ^{(17) (A)}
20131121	Trains without shut-off for POWER MAX 150 (external pump) ⁽¹⁸⁾
20131125	Trains with shut-off for POWER MAX 150 (external pump) ^{(18) (A)}
20131787	Trains without shut-off for POWER MAX 50 P DEP - 50 P - 65 P - 80 P - 100 - 110 - 130 (115 Hi) - 150 BACK-TO-BACK ⁽¹⁹⁾
20131791	Trains with shut-off for POWER MAX 50 P DEP - 50 P - 65 P - 80 P - 100 - 110 - 130 (115 Hi) - 150 BACK-TO-BACK ^{(19) (A)}
20131788	Trains without shut-off for POWER MAX 150 (external pump) BACK-TO-BACK ⁽²⁰⁾
20131792	Trains with shut-off for POWER MAX 150 (external pump) BACK-TO-BACK ^{(20) (A)}

(A) The "trains with shut-off" kits allow to exclude the single thermal module in order to proceed with its maintenance, while the other thermal modules continue to work

⁽¹⁷⁾ To be ordered for each collector side boiler with pump or valve installed inside the boiler

⁽¹⁸⁾ To be ordered for each collector side boiler with pump or valve installed outside the boiler

⁽¹⁹⁾ To be ordered for each boiler opposite to the collectors with pump or valve installed inside the boiler

⁽²⁰⁾ To be ordered for each boiler opposite to the collectors with pump or valve installed outside the boiler

POWER MAX - CASCADE APPLICATION - SELECTION OF COMPONENTS

4.4 Water collectors (delivery/return) -gas-condensate

CODE	DESCRIPTION
20133220	Kit of 3" flanged DN80 + threaded GAS 2" hydraulic collectors - for 1 frame ⁽²¹⁾
20130220	Kit of 3" flanged DN80 + threaded GAS 2" hydraulic collectors - for 2 frames (up to 485 kW) ⁽²²⁾
20130221	Kit of 3" flanged DN80 + threaded GAS 2" hydraulic collectors - for 3 frames (up to 485 kW) ⁽²²⁾
20130222	Kit of 5" flanged DN125 + flanged 3" flanged DN80 3" hydraulic collectors - for 2 frames (above 485 kW) ⁽²³⁾
20130223	Kit of 5" flanged DN125 + flanged 3" flanged DN80 3" hydraulic collectors - for 3 frames (above 485 kW) ⁽²³⁾
20132377	Collector and train cover kit - for single POWER MAX in cascade
20070903	Closing 3" cap kit ^(A)
20082190	Through 3" flange kit
20070907	Closing 5" cap kit ^(A)
20082191	Through 5" flange kit

^(A) They allow the closure, on one side, of the gas collector and the two hydraulic collectors

⁽²¹⁾ To be used only for BACK-TO-BACK configuration with no.2 boilers; it includes DN80 3" flanged delivery and return collectors, 2" threaded gas collector, condensate drain collector

⁽²²⁾ To be used with maximum output up to 485 kW. It includes DN80 3" flanged delivery and return collectors, 2" threaded gas collector, condensate drain collector

⁽²³⁾ To be used with maximum output over 485 kW. It includes DN 125 5" flanged delivery and return collectors, DN80 3" flanged gas collector, condensate drain collector

4.5 Additional safety devices

CODE	DESCRIPTION
20070910	Manifold kit for 3" safety devices housing ^(A)
20070912	Manifold kit for 5" safety devices housing ^(A)
20071190	Safety devices kit
20023104	Safety valve up to 460 kW (5,4 bar ØG.¾" F)
20023106	Safety valve up to 580 kW (5,4 bar ØG.1" F)
20009486	Fuel shut-off valve - Ø G.1" - TS=97°C - Capillary L=5 m ⁽²⁵⁾
20009482	Fuel shut-off valve - Ø G.1" 1/2 - TS=97°C - Capillary L=5 m ⁽²⁶⁾
20009483	Fuel shut-off valve - Ø G.2" - TS=97°C - Capillary L=5 m ⁽²⁷⁾
20061640	Fuel shut-off valve - Ø G.3" - TS=97°C - Capillary L=5 m ⁽²⁸⁾

^(A) Intended for use in cascade systems without primary circuit circulating pump

⁽²⁵⁾ Recommended up to maximum heat input of 131 kW, calculated considering gas supply pressure = 20 mbar

⁽²⁶⁾ Recommended up to maximum heat input of 230 kW, calculated considering gas supply pressure = 20 mbar

⁽²⁷⁾ Recommended up to maximum heat input of 580 kW, calculated considering gas supply pressure = 20 mbar

⁽²⁸⁾ Recommended up to maximum heat input of 1150 kW, calculated considering gas supply pressure = 20 mbar

Note: Calculation of the maximum permissible output of VICs with supply pressure of 20 mbar

Safety valve selection table:

Total cascade heat input (kW)	0 ÷ 460	461 ÷ 580	581 ÷ 920	921 ÷ 1160
(No.) Diameter of safety valve	1 × ¾"	1 × 1"	2 × ¾"	2 × 1"
	1 × code 20023104	1 × code 20023106	2 × code 20023104	2 × code 20023106

POWER MAX - CASCADE APPLICATION - SELECTION OF COMPONENTS

4.6. Hydraulic separator or plate heat exchanger

CODE	DESCRIPTION
20009467	Hydraulic 5" separator kit - up to 485 kW (3" connections) ⁽²⁹⁾
20069073	Hydraulic 10" separator kit - up to 580 kW (5" connections) ⁽³⁰⁾
20069074	Hydraulic 10" separator kit - up to 1120 kW (5" connections) ⁽³¹⁾
20132373	Connection kit for plate exchanger (DN80 on 3" collector side /DN50 on plate exchanger side) ⁽³²⁾
20132375	Connection kit for plate exchanger (DN125 on 5" collector side /DN65 on plate exchanger side) ⁽³²⁾
20132376	Connection kit for plate exchanger (DN125 on 5" collector side /DN100 on plate exchanger side) ⁽³²⁾

⁽²⁹⁾ To be used with maximum output up to 485 kW in combination with 3" collectors

⁽³⁰⁾ To be used with maximum output above 485 and up to 580 kW in combination with 5" collectors

⁽³¹⁾ To be used with maximum output above 580 kW and up to 1120 kW in combination with 5" collectors

⁽³²⁾ Connection kit with SP exchangers. For selection of the suitable plate exchanger, please contact the pre-sales service

4.7 Secondary circuit management

CODE	DESCRIPTION
1220599	Secondary circuit/heater probe ^(A) ^(**)
20130811	Electronic kit for management of single direct or additional mixed zone (max 16) ⁽³³⁾ ^(**)

^(A) Probe necessary for the heater or to control the secondary circuit, with temperature alignment with the one set for the primary circuit; probe also necessary to manage the additional mixed zones if secondary boilers ^(*) are used to control these zones

⁽³³⁾ Kit required if the number of direct or mixed heating zones is higher than the number of secondary boilers ^(*); the kit includes probe code 1220599 required for mixed zone

^(*) All boilers in cascade are considered secondary boilers except one: the one intended to manage the cascade.

^(**) The possibility, in case of boilers in cascade, to use the secondary boilers for management of additional zones instead of the kit 20130811 will be activated from 2019.

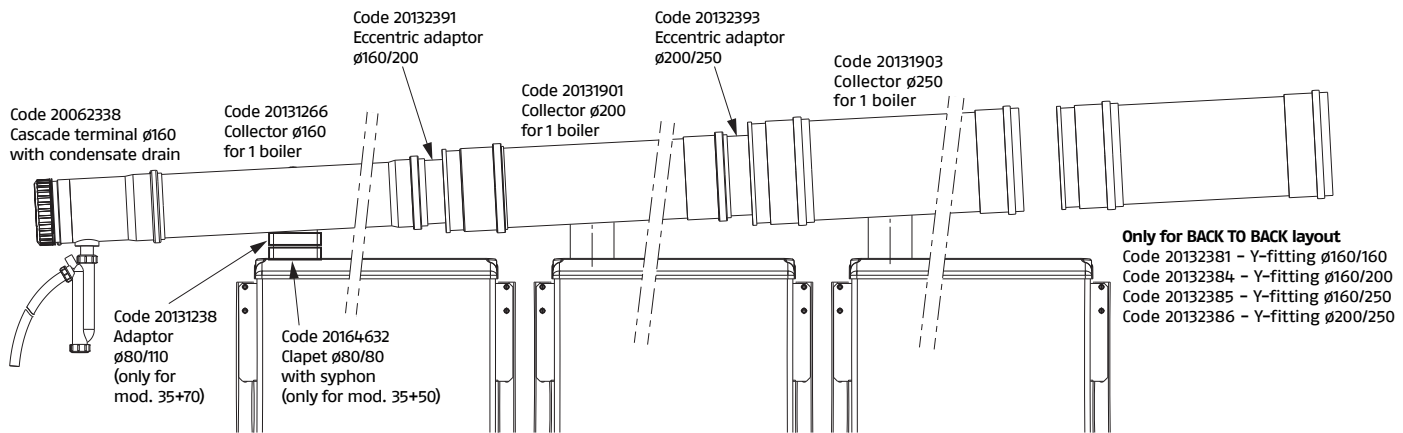

Note: use BeSMART Comfort Controls for room temperature adjustment

4.8 Sealed chamber conversion kit (type C)

CODE	DESCRIPTION
20131665	Type C conversion kit for POWER MAX 50 P DEP - 50 P - 65 P - 80 P
20131668	Type C conversion kit for POWER MAX 100 - 110 - 130 (115 Hi) - 150

POWER MAX - CASCADE APPLICATION - SELECTION OF COMPONENTS

4.9 Flue gas exhaust systems

For POWER MAX 50 P DEP - 50 P - 65 P - 80 P models

CODE	DESCRIPTION
20131238	Adapter $\varnothing 80/110$ mm ⁽³⁵⁾
20164632	Wafer check valve $\varnothing 80/80$ mm with trap ⁽³⁶⁾

⁽³⁵⁾ Required only for POWER MAX 50 P DEP - 50 P - 65 P - 80 P models

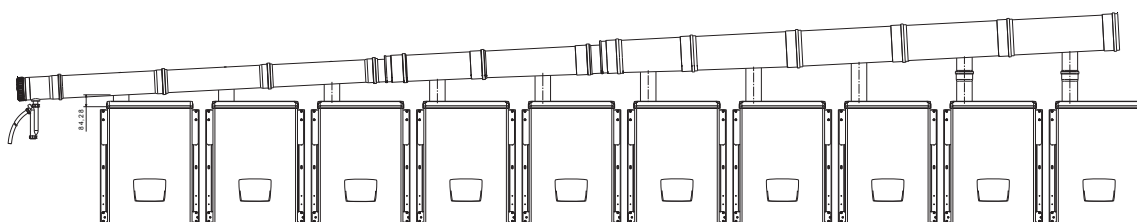

⁽³⁶⁾ Required only for POWER MAX 50 P DEP - 50 P models

POWER MAX - CASCADE APPLICATION - SELECTION OF COMPONENTS

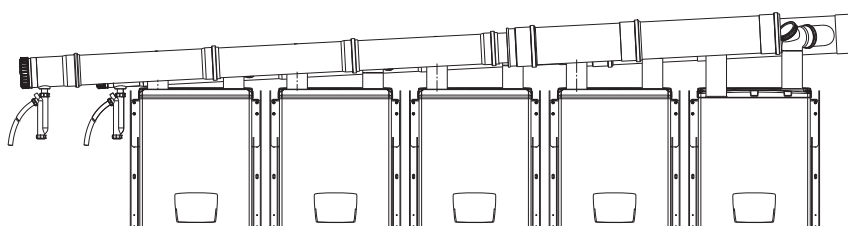

Flue gas exhaust collectors Ø 160/200/250 mm for all POWER MAX models

CODE	DESCRIPTION
20062338	Cascade terminal Ø160 with condensate drain
20131266	Collector Ø160 for 1 boiler
20132391	Eccentric adapter Ø160 / Ø200
20131901	Collector Ø200 for 1 boiler
20132393	Eccentric adapter Ø200 / Ø250
20131903	Collector Ø250 for 1 boiler
20132381	Y connector Ø160 / Ø160 (use only for FRONT - REAR configuration)
20132384	Y connector Ø160 / Ø200 (use only for FRONT - REAR configuration)
20132385	Y connector Ø160 / Ø250 (use only for FRONT - REAR configuration)
20132386	Y connector Ø200 / Ø250 (use only for FRONT - REAR configuration)

FRONT configuration - Max 10 boilers

BACK-TO-BACK configuration - Max 5 + 5 boilers

Note: the BACK-TO-BACK configuration has separate lines for each row of boilers, collector side and opposite side.

POWER MAX - CASCADE APPLICATION - SELECTION OF COMPONENTS

POWER MAX - CASCADE APPLICATION - SELECTION OF COMPONENTS

4.10 Remote control

CODE	DESCRIPTION
20132366	POWER MAX remote control kit (34)

(34) Necessary for hourly programming of the heater and for programming of zones (also those managed by the additional zone kits)

Key to layout

- 1. Remote control kit code 20132366
- 2. External probe code 20132778
- 3. Primary circuit probe code 20175716
- 4. Secondary circuit/heater probe code 1220599
- 5. Heating zone code 20130811

4.11 Treatment systems for condensate neutralization

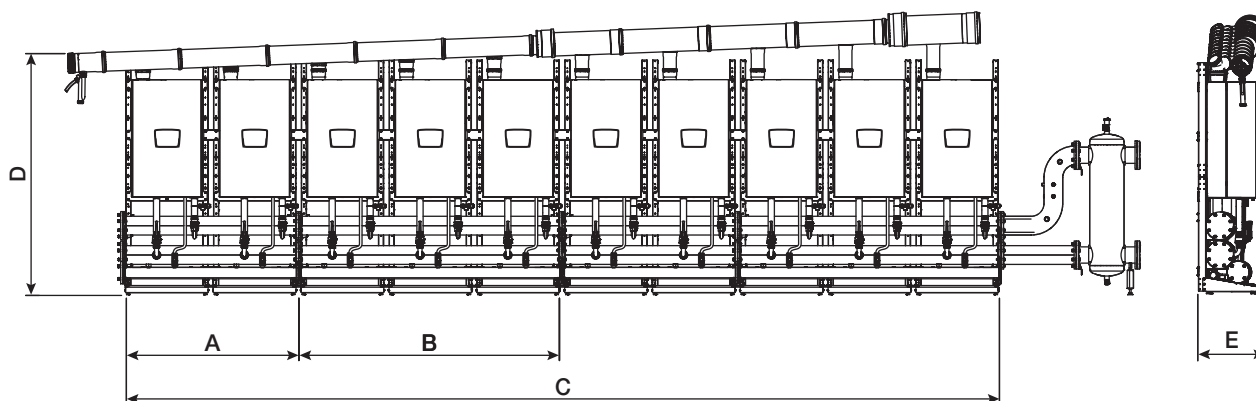

CODE	DESCRIPTION
4031811	Neutralization kit HN2 up to 270 kW (A) (B)
4031810	Neutralization kit N2 up to 450 kW (A)
4031812	Neutralization kit N3 from 450 to 1500 kW (A)
4031813	Neutralization kit HN3 from 270 to 750 kW (A) (B)

(A) Delivery time of the material if not available in stock: up to 30 working days from order validation date

(B) Equipped with extraction pumps

**POWER MAX BOX**

- Indoor thermal modules in cabinet compatible with outdoor installation through optional roof kit
- NEW condensing heat exchanger made of stainless steel
- Total pre-mixing and low polluting emissions: class 6
- Possibility of front cascade up to 1310 kW
- Thermoregulation as standard with optional external probe
- Low-consumption modulating circulating pumps as standard (also with ΔT logic)
- Output modulating and modular adjustment
- Automatic reversal (at adjustable time intervals) of burner ignition order
- Simultaneous management of two circuits: heater, high temperature
- Management of up to 16 zones with optional kit
- Automatic summer/winter switch-over
- Anti-legionella function as standard
- Suitable for remote control management (0-10V input or Modbus) with optional kit
- Flue gas wafer check valve built in the boiler
- Optional kit for conversion to watertight chamber
- Standard equipment: electronic management and control adjustment, hydraulic delivery and return collectors, gas, flue gas and condensate drain collectors
- Availability of a wide range of system accessories
- LPG conversion kit supplied as standard

Pre-mixed open chamber condensing

POWER MAX BOX

3. Hydraulic interception of thermal modules

CODE	DESCRIPTION
20145170	Hydraulic shut-off kit for single unit with 3-way valve with discharge to atmosphere ⁽¹⁾

⁽¹⁾ To be ordered in the same number as the number of units in the system

4. Manifolds, safety kits and hydraulic accessories

CODE	DESCRIPTION
20157593	Junction kit for cascade (Fume Ø300 - Air Ø300 - Condensation Ø50)
20145237	SJunction kit for cascade with spacer (150 mm) ⁽¹⁾
20071190	Safety kit ⁽²⁾
20023104	Safety valve up to 460 kW (5.4 bar ØG.¾" F)
20023106	Safety valve up to 580 kW (5.4 bar ØG.1" F)
20009486	Fuel shut-off valve kit (VIC) - ØG.1" ⁽³⁾⁽⁴⁾
20009482	Fuel shut-off valve kit (VIC) - ØG.1" ½ ⁽⁴⁾⁽⁵⁾
20009483	Fuel shut-off valve kit (VIC) - ØG.2" ⁽⁴⁾⁽⁶⁾
20061640	Fuel shut-off valve kit (VIC) - ØG.3" ⁽⁴⁾⁽⁷⁾
20145184	Flanged 3"/2" reduction kit (DN80/DN50)
20094187	Flange kit 2" DN50 PN6 - Gas 2" F
20161191	Flange kit 3" DN80 PN6 - 3" DN80 PN16
20146852	Flanged DN80 to threaded ØG.2" adapter kit for fuel shut-off valve
20145183	Flanged reduction kit DN125/DN80
20147990	2" - 1" ½ gas adapter for VIC valve
20147994	2" - 1" gas adapter for VIC valve
20070903	3" closing plugs kit ⁽⁸⁾
20070907	5" closing plugs kit ⁽⁸⁾
20082190	Flange kit 3"
20082191	Flange kit 5"
20167872	Extension kit 3" ⁽⁹⁾⁽¹¹⁾
20167873	Extension kit 5" ⁽¹⁰⁾⁽¹¹⁾
20145172	Hydraulic flow manifold 3"
20145177	Hydraulic flow manifold 5"
20145181	Hydraulic return manifold 3"
20145182	Hydraulic return manifold 5"

⁽¹⁾ Includes connections H2O 5" - Gas 3" - Flue gas Ø300 - Condensate Ø50.

⁽²⁾ Does not include safety valve and fuel shut-off valve.

⁽³⁾ Recommended up to maximum output of 131 kW, calculated considering gas supply pressure = 20 mbar.

⁽⁴⁾ Tripping temperature at 97 °C - Capillary length 5 m.

⁽⁵⁾ Recommended up to maximum output of 230 kW, calculated considering gas supply pressure = 20 mbar.

⁽⁶⁾ Recommended up to maximum output of 580 kW, calculated considering gas supply pressure = 20 mbar.

⁽⁷⁾ Recommended up to maximum output of 1310 kW, calculated considering gas supply pressure = 20 mbar.

⁽⁸⁾ Kit to close the unused side.

⁽⁹⁾ To be installed in case of remote primary/secondary circuit interface with or without technical cabinet up to 485 kW

⁽¹⁰⁾ To be installed in case of remote primary/secondary circuit interface with or without technical cabinet up to 1310 kW

⁽¹¹⁾ Specific sleeves are provided on the delivery tube for housing devices

Note: for calculation of maximum permissible output of VICs with supply pressure other than 20 mbar, please contact the pre-sales service.

POWER MAX BOX

5. Hydraulic separators/plate heat exchangers

CODE	DESCRIPTION
20145255	Hydraulic separator, 3" connections (up to 485 kW)
20145260	Hydraulic separator, 5" connections (up to 1310 kW)
20145252	LH technical cabinet with hydraulic separator (up to 485 kW) ⁽¹⁾
20145254	LH technical cabinet with hydraulic separator (up to 1310 kW) ^{(D)(1)}
20145247	RH technical cabinet with hydraulic separator (up to 485 kW) ⁽¹⁾
20145250	RH technical cabinet with hydraulic separator (up to 1310 kW) ^{(D)(1)}
20146827	Connection kit for plate exchanger DN80/DN50
20146828	Connection kit for plate exchanger DN125/DN65
20146829	Connection kit for plate exchanger DN125/DN100
20146833	LH technical cabinet for plate exchanger (up to 485 kW)
20146835	LH technical cabinet for plate exchanger (up to 800 kW) ^(D)
20146836	LH technical cabinet for plate exchanger (up to 1310 kW) ^(D)
20146830	RH technical cabinet for plate exchanger (up to 485 kW)
20146831	RH technical cabinet for plate exchanger (up to 800 kW) ^(D)
20146832	RH technical cabinet for plate exchanger (up to 1310 kW) ^(D)
20158562	RH/LH technical cabinet for housing 3" extension kit (270/485 kW) ^(D)
20158564	RH/LH technical cabinet for housing 5" extension kit (580/1310 kW) ^(D)

^(D) Availability of the material at our warehouse: 25 working days from the order validation date.

⁽¹⁾ They contain the hydraulic separator.

POWER MAX BOX 1500		1x●		2x●		1x●		2x●			1x●			(**)

NOTE: to be used only if the outlet on flue gas side is the same as the outlet on the hydraulic side

(*) Flue gas exhaust/air intake on technical cabinet side not available in case of watertight installation, air intake on the boiler side mandatory.

(**) In case of technical cabinet with heat exchanger and watertight installation, the air intake must be on the machine side and not on the technical cabinet side.

In this case, also for the pump technical cabinet, if present, it is necessary to use only one code 20147028.

AIR CONDITIONING

AIR CONDITIONERS	314
------------------	-----

**BREVA - WALL-HUNG MONO INVERTER AIR CONDITIONERS**

- Wide range with four monosplit models, 2.6 - 3.6 - 5.0 - 7.0kW, and one dual split model, 5.0kW
- Energy class A++, A+
- Refrigerant gas R32
- Backlit display
- Remote control supplied as standard with large backlit display
- Front panel in glossy white ABS
- Four-speed indoor unit fan with "Sleep" function, "QUIET" (20 dBA)
- "SMART" mode with automatic heating/cooling switching
- AUTORESTART function in case of blackout
- Possibility of remote control with APP, via Smartphone and Tablet, with optional Wi-Fi kit

(A) The width value the outdoor units does not include the connection overall dimensions: +76 mm for monosplit 9000 version; +60 mm for monosplit 12000 and 18000 versions; +96 mm for monosplit 24000 version.

The efficiency classes are declared in compliance with standard EN 14825, for temperate climate zone and in correspondence of Pdesign -10°C in heating mode and Pdesign 35°C in cooling mode.

Performance refers to the following conditions:

(1) indoor unit air inlet temperature 20°C T d.b., outdoor temperature 7°C d.b., 6°C w.b.

(2) indoor unit air inlet temperature 27°C Td.b., 19°C Tw.b., outdoor temperature 35°C d.b.

The possible combinations are the ones indicated in the table. Combinations other than those indicated are not permitted. It is not allowed to use units with item code not included in the list.

TIVANO WALL

» available as standard

- **Wall-mounted fan coils for heating / cooling, dehumidification.**
- High efficiency DC-Inverter Technology range.
- Three sizes of capacity (heating from 2.78 kW to 5.72 kW; cooling from 1.07 kW to 2.31 kW).
- On-board touch LCD display , unit with temperature display and operation.
- Remote control supplied as standard.
- **Fan with DC-inverter Brushless motor.**
- Highly silent.
- 2/3-ways valve kits available as option to be installed inside the unit.
- 128 mm depth.
- Motorized wings for a correct air distribution.
- Hydraulic connections to the right.
- White color.

HEAT-EXCHANGERS	344

(89mm H x 135mm W x 28mm D)

(86mm H x 86mm W x 21mm D)

- **Programmable WiFi thermostat** for the complete control of your home comfort from wherever you are, via your Smartphone and Tablet.
- **It offers the function of remote boiler interface if connected to Beretta boilers via OTBus.**
- Specifically engineered to compliment the Beretta boiler range, **BeSMART, with a back-lit display**, is compatible(*) with the majority of boiler brands on the market, also in WiFi configuration.
- Supplied with WiFi Box for connection to the ADSL home WiFi modem to access Internet.
- BeSMART App available free of charge (for iOS and Android ≥ version 3.0) to download to your Smartphone and Tablet for the home comfort management from anywhere in the world.
- Ideal replacement for old thermostats, not just Beretta, it is available also without WiFi box, to be used as a traditional thermostat.
- Possibility to manage up to 8 different heating zones (non-mixed zones), from wherever you are in the world, also via App.
- 3 temperature levels: comfort, economy, frost protection.
- 4 working modes: auto, manual, party, holiday.
- Cooling mode thermostat setting (also via App).
- Setting room temperature range from +3°C to +35°C, with 0.2°C increments (also via App).
- Weekly central heating programming, at 30-minute intervals (also via App).
- Room temperature and outdoor temperature displayed (also on App).
- Low battery indicator icon (also on App).
- BeSMART outputs:
wired ON/OFF; wired OTBus; wireless ON/OFF; wireless OTBus.
- End-user account service on Beretta Cloud
- BeSMART is powered by 2 AA 1.5V batteries (included in the package). It therefore does not require a fixed 230V mains power supply.

Exclusive to Beretta (), additional TOP advantages by BeSMART:**

- Complete control of home comfort and boiler - including DHW setting - also via App.
- Enhanced comfort and savings deriving from BeSMART working as modulating programmable thermostat - also via App.
- Alerts notification and remote boiler reset - also via App.
- Possibility of online connection of your boiler to an authorized Beretta Service Centre (check the availability of these additional services in your country with your local distributor).

(*) when used as a WiFi programmable thermostat with boilers with ON/OFF control.

(**) provided that your Beretta boiler features OTBus - see the BeSMART compatible boilers matrix in the following pages.

Wi-Fi Remote Controls and Chronothermostats

CODE	MODEL	FUNCTIONS	DIMENSIONS H X L X D (mm)	CLASS - ErP CONTRIBUTION

(1) With Wi-Fi Box for Internet connection via home ADSL Wi-Fi router

(2) For cable connection to the boiler. Compatible for radio frequency connection with Wi-Fi Box code 20111885 for Internet connection via home ADSL router

(3) With boilers in the Exclusive Boiler Green and Exclusive CAI catalogue, code 20164477 "LINK MODE interface board" is required (only in the case of connection via OTBus).

* With all boilers

** With Beretta boilers

BeSMART Comfort Controls

CODE		DESCRIPTION
20143539		BeSMART Wi-Fi COMFORT CONTROL Wireless management control for all boilers, consisting of a chronothermostat and a WiFi device for internet connection through home ADSL WiFi router. It also allows the remote switching on and off of boilers through APP (iOS and Android \geq vers. 3.0) with Smartphone and Tablet. Remote Control and Modulating Chronothermostat function (band 0.5°C). In conjunction with Beretta boilers ⁽⁴⁾ (Class VI according to ErP directive). Function for ON/OFF universal chronothermostat in combination with all boilers (Class I according to ErP directive). (Also includes: batteries, connection cables, transformer, OTBus connector kit for Ciao Green and Ciao C.A.I. LX, screws, dowels, double sided adhesive tape, magnetic adhesive).
20143659		BeSMART COMFORT CONTROL Chronothermostat for cable control of all boilers. Remote Control and Modulating Chronothermostat function (band 0.5°C). In conjunction with Beretta boilers ⁽⁴⁾ (Class V according to ErP directive). Function for ON/OFF universal chronothermostat in combination with all boilers (Class I according to ErP directive). Compatible with "Wi-Fi Box" optional kit for Internet connection via home ADSL Wi-Fi router. (Also includes: batteries, screws, dowels, double sided adhesive tape; does not include OTBus connector kit for Ciao Green and Ciao C.A.I. LX).

(4) With boilers in the Exclusive Boiler Green and Exclusive CAI catalogue, code 20164477 "LINK MODE interface board" is required (only in the case of connection via OTBus).

Specific accessories for BeSMART

CODE	DESCRIPTION
20111885	Wi-Fi Box for Internet connection via home ADSL router
20101748	ALPHA 7D WIRELESS weekly digital chronothermostat (86x86x20 mm) ⁽¹⁾
20112079	RF - WIRELESS boiler receiver

CODE	DESCRIPTION	
20111885		Wi-Fi BOX Wi-Fi device that can be combined with BeSMART Comfort Controls (up to 8 pcs). Allows connection to the Internet via Wi-Fi connection to the home ADSL router and radio frequency communication with the BeSMART Comfort Controls. Also includes: connection cables, transformer, magnetic adhesive.
20101748		ALPHA 7D WIRELESS WEEKLY DIGITAL CHRONOTHERMOSTAT ⁽¹⁾ ON/OFF chronothermostat. Includes an RF WIRELESS receiver for wireless connection to the boiler. If radio frequency is used to connect with BeSMART Wi-Fi Comfort Control Box, the supplied RF receiver is not required ⁽¹⁾ .
20112079		RF - WIRELESS BOILER RECEIVER (Pre-wired) radio frequency only receiver to be connected in the boiler. It can be used to wirelessly connect a BeSMART Comfort Control with the boiler or to connect a BeSMART Wi-Fi Comfort Control with a boiler far from the home Wi-Fi network. (Also includes magnetic adhesive tape).

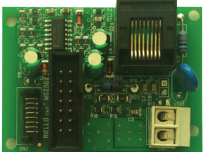

(1) The RF WIRELESS receiver, supplied with the kit, offers a number of alternative uses to the main one of receiving the signal from the ALPHA 7D Chronothermostat in the boiler:

(a) it can be used to activate in RF a zone valve, whose limit switch must anyway be wired in the boiler

(b) in case you have a Wi-Fi Box and the ADSL Wi-Fi signal in the house is weak near the boiler, you can install the RF WIRELESS receiver by connecting it in the boiler instead of the Wi-Fi Box, that in turn could be moved closer to the ADSL Wi-Fi router of the house. In this case the RF WIRELESS receiver would have the function of RF signal bridge and the ALPHA 7D would be paired with the Wi-Fi Box, maintaining the WIRELESS communication.

Specific accessories for BeSMART

CODE	DESCRIPTION
20112080	External photovoltaic probe - WIRELESS
20164477	Interface board kit (LINK MODE) for EXCLUSIVE BOILER GREEN
20164205	OTBus connector for Ciao Green, Ciao AT, Mynute C.A.I. LX, Ciao C.A.I. LX

CODE	DESCRIPTION	
20112080		EXTERNAL PHOTOVOLTAIC PROBE - WIRELESS Photovoltaic wireless external temperature sensor, for detection and transmission of the outdoor temperature to the compatible Beretta boilers, used to activate the boiler thermoregulation. (Also includes: pre-wired boiler receiver with boiler supply connector, screws, dowels. Compatible with the boilers in the catalogue: Mynute Green E, Mynute Boiler Green, Mynute Rain Green E, Ciao Green.
20164477		INTERFACE BOARD KIT (LINK MODE) Interface board required to connect BeSMART Wi-Fi Comfort Control or BeSMART Comfort Control to Exclusive Boiler Green and Exclusive CAI boilers in the catalogue. To be used only in case of operation via OTBus; for use in ON/OFF mode the code is not necessary.
20164205		OTBus CONNECTOR for CIAO GREEN - CIAO AT - MYNUTE C.A.I. LX - CIAO C.A.I. LX OTBus connector to be used (only one piece) with boilers Ciao GREEN, Ciao AT and Ciao C.A.I. LX in case you buy code 20143659 BeSMART Comfort Control (the connector is not required with BeSMART Wi-Fi Comfort Control code 20143539 as it is already included in this code).

BeSMART

A SMARTER THERMOSTAT.

A+ SYSTEM

Possibility to form Class A+ systems, without adding further optionals*, if combined with Mynute Green E, Meteo Green E (also Box versions), Mynute Rain Green E (also Box versions) boilers.

MANAGEMENT OF HOME COMFORT VIA SMARTPHONE AND TABLET

Whether you're off on holiday, out shopping or just working late, you can manage your home heating remotely via the BeSMART App from your smartphone or tablet.

ON/OFF

Universal ON/OFF Chronothermostat function compatible with all boilers even in the case of replacement. Class I and 1% contribution according to ErP directive on seasonal performance, in System calculation.

0.5 BAND MODULATING

Remote Control and Modulating Chronothermostat function (band 0.5°C) paired with Beretta boilers*. Class VI and 4% contribution according to ErP directive on seasonal performance, in System calculation.

MANAGEMENT WITH TABLET AND SMARTPHONE

Compatible with Smartphones and Tablets that use Android system (≥ vers. 3.0) or iOS.

FREE OF CHARGE APP

BeSMART App is downloadable free of charge for Android (≥ 3.0 version) and iOS for the operation and programming of your boiler wherever you are, via smartphone and tablet.

WiFi

WiFi communication between the WiFi Box and the WiFi ADSL home modem router to connect your BeSMART to the internet. As an alternative to the ADSL modem, possibility of internet connection through the specific WiFi router for SIM card (See BeSMART accessories).

MULTIZONE

Possibility to manage up to 8 different heating zones from wherever you are in the world via App, from your smartphone or tablet. (RF/ Radio Frequency communication among BeSMART Controls - wireless communication within 40m distance).

24 HOUR - 7 DAY PROGRAMMING

24 hour weekly programming; possibility to choose among different pre-set programs.

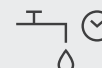

CENTRAL HEATING 24 HOUR PROGRAMMING

24 hour central heating programming, at 30 minutes intervals.

COOLING 24 HOUR PROGRAMMING

24 hour cooling programming, at 30 minutes intervals (if combined with a heat pump).

DOMESTIC HOT WATER 24-HOUR PROGRAMMING

24-hour DHW programming, at 30 minutes intervals (enabled via OTBus connection).

HOLIDAY FUNCTION

Enables to enter the number of days you will be away on holiday, during which your heatgenerator will work in order to keep an energy-saving temperature.

OUTDOOR TEMPERATURE

Outdoor temperature can be read by the outdoor sensor or from internet. If you set the home location on the App of your smartphone or tablet, the outdoor temperature can be read from internet.

INDOOR TEMPERATURE

Indoor temperature is displayed on BeSMART or can be monitored through the BeSMART App via Smartphone or Tablet.

PARTY FUNCTION

Enables unscheduled and immediate activation of heating/cooling (comfort T3 temperature) until the midnight of that day, without modifying the set program.

BESMART COMPATIBLE BOILERS TABLE

This matrix shows the compatibility of BeSMART with the current Beretta boilers.

A full list of Beretta compatible boilers (including old models) is available at www.besmart-home.com

In the following pages, you will find several schemes showing the main application solutions of BeSMART.

Unders each scheme are the codes of the components necessary to achieve that type of installation.

(A) To enable OTBus connection with this boiler range, it is necessary the OTBus Interface Board (code 20164477).

(B) To enable OTBus connection with this boiler range, it is necessary the OTBus connector (code 20164205), in addition to the BeSMART CONTROL (code 20143659).

(C) This code is necessary in addition only to BeSMART CONTROL (code 20143659), to enable OTBus connection with this boiler range. In the BeSMART WIFI CONTROL KIT, the OTBus connector is included as standard in the package.

BESMART WIFI - single zone

SCHEME 1

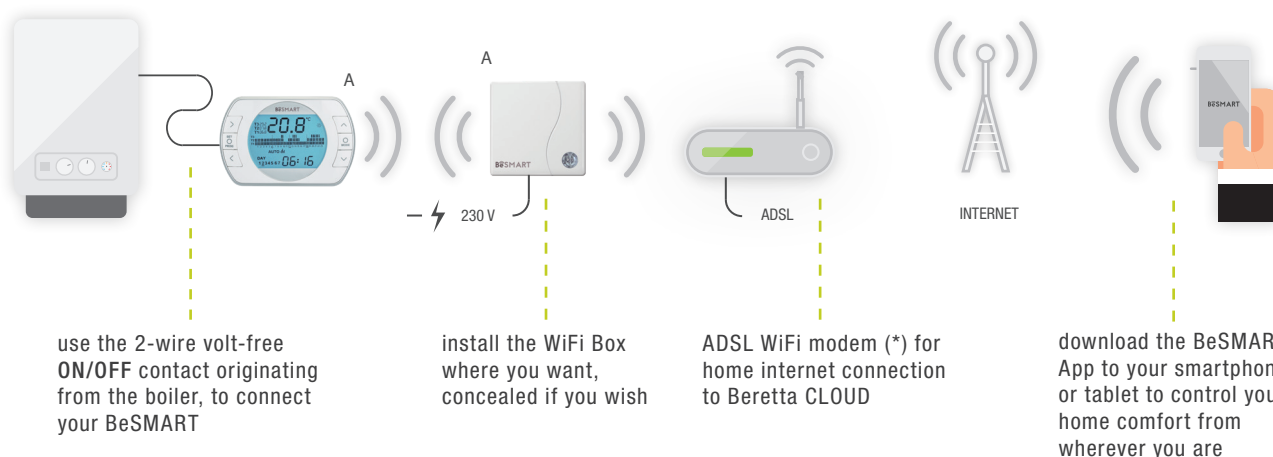

as UNIVERSAL WIFI PROGRAMMABLE THERMOSTAT

ON/OFF control

The typical BeSMART 'universal' solution, ideal also for replacement.

This application can be used on all brands of boilers that have a simple ON/OFF control, not just Beretta. Use the two existing wires to connect directly to the ON/OFF terminals of the BeSMART control. Connect the BeSMART WiFi box to a power outlet, download the BeSMART App to your tablet or smartphone (from the App Store or Google play) and follow the instructions to program your system.

Now you can start 'surfing' in the home comfort, from wherever you are.
It couldn't be simpler.

(*) In case the ADSL WiFi modem is not present, you can buy the "WIFI ROUTER FOR SIM CARD" (code 20112113), enabling internet connection via a SIM data card. See BeSMART specific accessories.

NB: When replacing a thermostat that has more than two wires, identify the 'switch' wires and connect only them to the BeSMART ON/OFF terminals (do not connect a Neutral supply).

single zone configuration

REFERENCE	CODE	QUANTITY	DESCRIPTION
A	20143539	1	 BeSMART WIFI CONTROL KIT

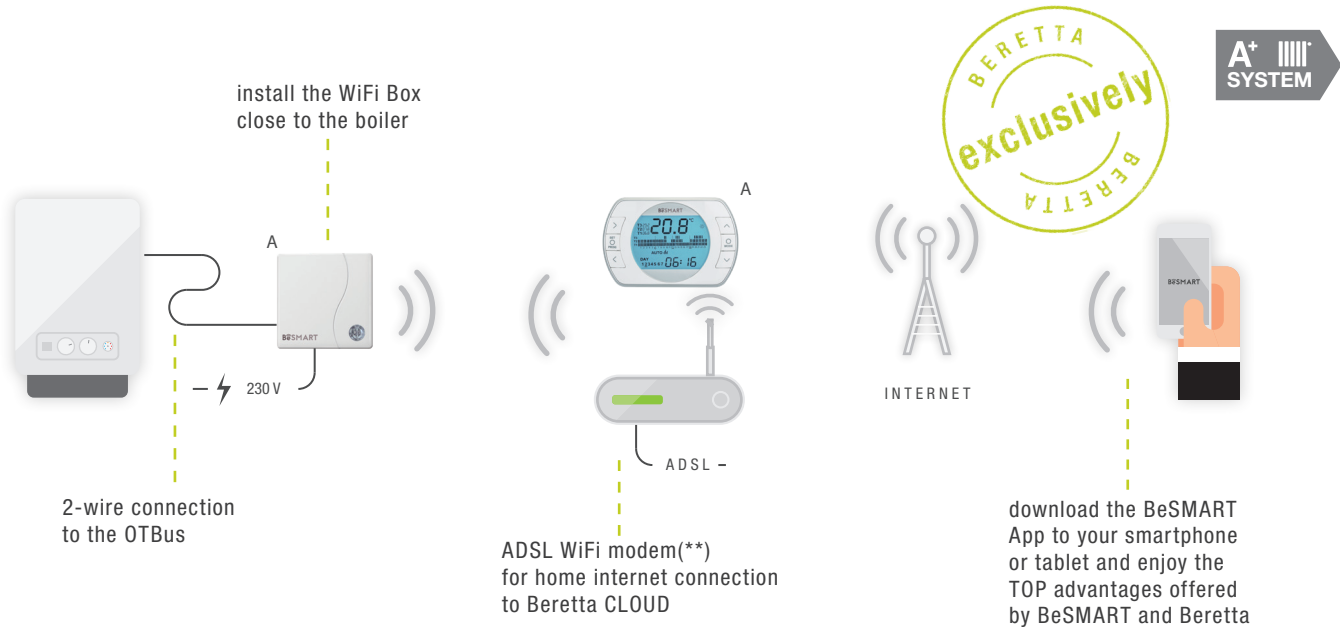

BESMART WIFI single zone

SCHEME 2

as MODULATING WIFI PROGRAMMABLE THERMOSTAT

via Beretta OTBus connection

Exclusive to Beretta, an advanced solution and enhanced service that is enabled via your boiler's OTBus connection. With BeSMART and Beretta OTBus, you will have a greater degree of connectivity: you can view your boiler's operating conditions, alerts, parameters, home and outdoor temperature and much more. You can even reset your boiler when needed. You also have the possibility of online connection of your boiler to an authorized Beretta Service Centre (check the availability of this additional service in your country with your local distributor). Furthermore, BeSMART WiFi combined with Beretta boilers of latest generation enables to create, without additional optionals, A+ Class systems (*). Check the OTBus compatibility for each boiler in the BeSMART compatible boilers matrix. For older Beretta boilers, check on the site www.besmart-home.com which models are compatible with OTBus.

(*) Check the product matrix of Beretta condensing boilers in this catalogue to see which models achieve A+ class system.
(**) In case the ADSL WiFi modem is not present, you can buy the "WIFI ROUTER FOR SIM CARD" (code 20112113), enabling internet connection via a SIM data card. See BeSMART specific accessories.

single zone configuration				
REFERENCE	CODE	QUANTITY	DESCRIPTION	
A	20143539	1		BeSMART WIFI CONTROL KIT

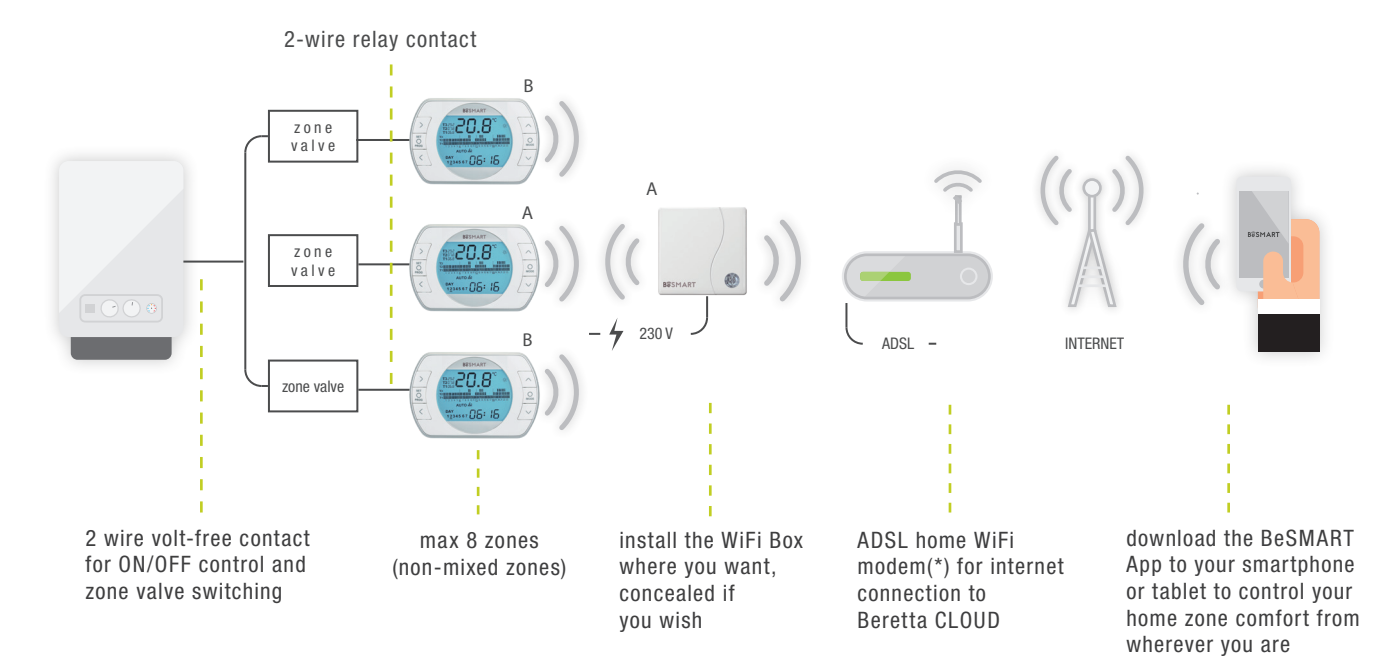

BESMART WIFI multi-zone

SCHEME 3

as UNIVERSAL PROGRAMMABLE WIFI THERMOSTAT

zone valve control and boiler ON/OFF control

Even in existing multi-zone systems, BeSMART is simple and universal.
BeSMART has a control relay for zone valve (max 0.25A at 230 V, or max 2 A at 24V).
Just replace each of the old thermostats with a BeSMART and connect the wires to the BeSMART output relay.
As an alternative option, an RF Programmable Room Thermostat can be used for each additional zone.
See BeSMART accessories.

(*) In case the ADSL WiFi modem is not present, you can buy the "WIFI ROUTER FOR SIM CARD" (code 20112113), enabling internet connection via a SIM data card. See BeSMART specific accessories.

NB: When replacing a thermostat that has more than two wires, identify the 'switch' wires and connect only them to the BeSMART ON/OFF terminals (do not connect a Neutral supply).

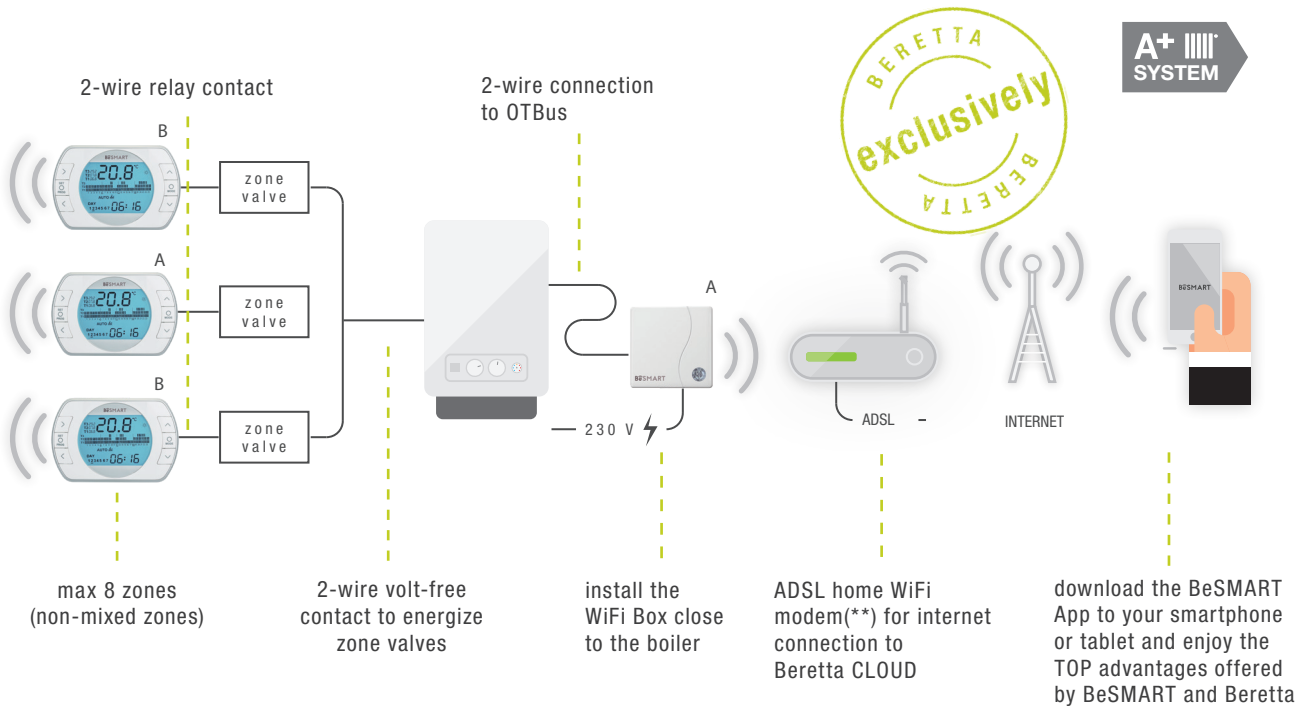

ex. configuration for 3 zones **				
REFERENCE	CODE	QUANTITY	DESCRIPTION	
A	20143539	1		BeSMART WIFI CONTROL KIT
B	20143659	2		BeSMART CONTROL

(**) In case of 8 zones, for example, you would require 7 x code 20143659 (BeSMART Control), in addition to 1 x code 20143539 (BeSMART WIFI CONTROL KIT).

BESMART WIFI multi-zone **SCHEME 4**

as MODULATING WIFI PROGRAMMABLE THERMOSTAT **zone valve control via Beretta OTBus connection**

Even on multi-zone systems, with a Beretta boiler that is OTBus compatible, you can enable advanced service and benefit TOP advantages. With BeSMART and Beretta OTBus, you will have a greater degree of connectivity: you can view your boiler's operating conditions, alerts, parameters, home and outdoor temperature and much more. You can even reset your boiler when needed. You also have the possibility to connect online your boiler to an authorized Beretta Service Centre (check the availability of this additional service in your country with your local distributor). Furthermore, BeSMART WiFi combined with Beretta boilers of latest generation enables to create, without additional optionals, A+ Class systems (*). Check the OTBus compatibility for each boiler in the BeSMART compatible boilers matrix. For older Beretta boilers, check on the site www.besmart-home.com which models are compatible with OTBus.

(*) Check the product matrix of Beretta condensing boilers in this catalogue to see which models achieve A+ class system.
(**) In case the ADSL WiFi modem is not present, you can buy the "WIFI ROUTER FOR SIM CARD" (code 20112113), enabling internet connection via a SIM data card. See BeSMART specific accessories.

BESMART - single zone

SCHEME 6

as MODULATING PROGRAMMABLE THERMOSTAT

via Beretta OTBus connection

Exclusive to Beretta, if you are not interested in the home comfort management via Smartphone or Tablet and your boiler is OTBus compatible, BeSMART can work as a modulating programmable thermostat. In addition, with BeSMART and Beretta OTBus, you will have a greater degree of connectivity: you can view your boiler's operating conditions, alerts, parameters, home and outdoor temperature and much more. You can also reset your boiler when needed. Furthermore, BeSMART WiFi combined with Beretta boilers of latest generation enables to create, without additional optionals, A+ Class systems (*). Check the OTBus compatibility for each boiler in the BeSMART compatible boilers matrix. For older Beretta boilers, check on the site www.besmart-home.com which models are compatible with OTBus.

(*) Check the product matrix of Beretta condensing boilers in this catalogue to see which models achieve A+ class system.

single zone configuration				
REFERENCE	CODE	QUANTITY	DESCRIPTION	
B	20143659	1		BeSMART CONTROL

BESMART - single zone**SCHEME 7****as RF MODULATING PROGRAMMABLE THERMOSTAT**

via Beretta OTBus connection and RF receiver

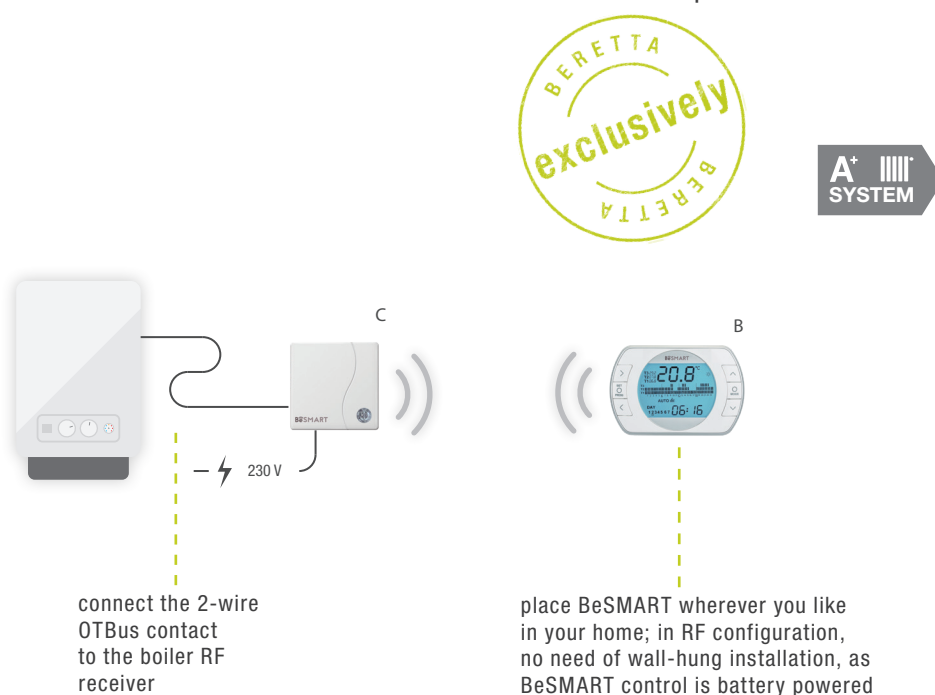

Exclusive to Beretta, if your boiler is OTBus compatible and you are not interested in the home comfort management via Smartphone or Tablet, BeSMART can work also as an RF wireless modulating programmable thermostat, while ensuring in addition all extensive advantages from Beretta and OTBus: you can view your boiler's operating conditions, alerts, parameters, home and outdoor temperature and much more. You can also reset your boiler when needed.

The receiving range between BeSMART Control and the RF receiver is 40 metres, which is large enough for most household applications. Anyway, in this RF configuration, BeSMART doesn't need to be wall mounted, as it is powered by batteries.

Furthermore, BeSMART combined with Beretta boilers of latest generation enables to create, without additional optionals, A+ Class systems (*).

Check the OTBus compatibility for each boiler in the BeSMART compatible boilers matrix.

For older Beretta boilers, check on the site www.besmart-home.com which models are compatible with OTBus.

(*) Check the product matrix of Beretta condensing boilers in this catalogue to see which models achieve A+ class system.

REFERENCE	CODE	QUANTITY		DESCRIPTION
B	20143659	1		BeSMART CONTROL
C	20112079	1		BOILER RF RECEIVER

- 7-day programmable room thermostat (in 60-minutes steps).
- Built-in heating programme.
- **3°C ÷ 35°C selectable temperature range with 0.2°C increments.**
- 4 modes of operation: auto, advance, off, party.
- 3-temperature selections – comfort, economy, frost.
- Display boiler 'ON'.
- Selectable ON/OFF hysteresis.
- Low battery indicator.
- Summer function for cooling mode (separator relay needed).
- Included in the package: 1.5V batteries (type AAA), screws and wall plugs, double side adhesive.

Additional features on Alpha 7D Wireless

- Wireless for a flexible installation (pre-cabled).
- 40-metre range.
- Receiver can be mounted to wall (screws and plugs included) or mounted to the side of the boiler (magnetic strips included).

This image shows a full page of blank, lined paper. It features approximately 28 horizontal grey lines spaced evenly apart, typical of notebook paper. The lines extend across the entire width of the page, leaving small margins at the top and bottom. There are no vertical lines, text, or other markings on the page.
