Beretta Launches Brevia: A New Range of Mono-split and Dual-split Air Conditioners

LECCO, Italy, XX August, 2020 — Beretta is pleased to present Brevia™ a new range of air conditioners for residential applications, developed to be the ideal choice for home comfort. Beretta, a part of [Riello](#) Group, a leader in products and services for heating, air conditioning and energy efficiency, is a part of Carrier Global Corporation (NYSE: CARR), a leading global provider of innovative heating, ventilating and air conditioning (HVAC), refrigeration, fire, security and building automation technologies.

The new range of Brevia air conditioners is divided into four mono-split models, with a cooling capacity of 2.6kW, 3.6kW, 5.0kW and 7.0kW, and one dual-split model with a cooling capacity of 5.0kW. The dual-split model can be installed with three different combinations of indoor units, the same ones used in the mono-split models, to best fit the required layout. The models use the R32 refrigerant, a reduced GWP solution, in line with the environmentally friendly approach Beretta has always used in its products.

All available models and combinations fall within efficiency class A+ in heating and A+++ in cooling. Indoor units of the Brevia range have a modern and elegant design, including an infrared remote control with a large backlit display that allows

access to all unit functions, displays the room temperature and is also equipped with a daily timer for programming the on and off switch.

Additionally, Brevia units can be equipped with a Wi-Fi kit, ordered separately, which allows a user to easily manage the air conditioner from outside the home, anytime and anywhere. Using the free Beretta App, which can be downloaded for iOS and Android systems, users can control the Brevia air conditioner directly from a smartphone or tablet.

Beretta Brevia is the ideal choice for air conditioning. For more information, visit berettaclima.it.
